DESCRIPTION	The Repair and Calibration of Condition Monitoring Equipment for Various Grids in Transmission for a period of 36 months		
PR NO.:	1074815664 - South Grid 1074817916 - East Grid 1074819807 - NE 1074834953 - West 1074834855 - North 1&2 1074845393 - Central		
ENQUIRY NO:	WC1015TK		

1. REQUEST TO RE-ISSUE A TENDER

In accordance with the latest revision of Eskom's Procurement and Supply Chain Management Procedure 32-1034, permission is requested to cancel and re-issue tender enquiry No. **WC1015TK** for the repairs and calibration of condition monitoring equipment for various grids in Transmission for a period of 36 months.

2. BACKGROUND

High Voltage Plant (HVP) within all the Transmission Grids is responsible for, among others, the monitoring of all high voltage equipment in the high voltage yards. As such, there are specialized equipment that is used to conduct this work and the technicians then produce reports from their findings and suggest the most appropriate recommendations to the business.

Various purchase requisitions were sent to the Procurement Department via the SAP system. The procurement mechanism selected to enable this purchase is that of open tendering where an enquiry was issued on the 14 February 2022 closing on the 08 March 2022. A clarification meeting was held on the 28 February 2022 via Ms Teams, no external parties attended the meeting. No response was received after tender close, and this was communicated by the Risk and Governance tender office.

RECOMMENDATION

It is recommended that approval be granted to cancel and re-issue enquiry No WC1015TK in order to conclude a contract for the repairs and calibration for Condition Monitoring Equipment for Various Grids in Transmission for a period of 36 months
