Clarification Questions (MPGRO10252GX)

1. Please kindly assist with the clarification for tender no MPGRO10252GX. Please can you confirm the following in order for us to quote accordingly.
 - Voltage
 - Mounting
 - Starting Method
 - Coupling Method
 - End User Specification

Kindly refer to attached price list below for details, please ensure you quote for 5 years

2. May you please assist with information below to enable us to quote new motors:
 1. Voltage
 2. Frame size
 3. Foot mounting
 4. Shaft size

Take note, we will also require the kW/HP of motors with serial number N005564/2 & 180012.5 on the price list C2.2

Kindly refer to attached price list below for details, please ensure you quote for 5 years

3. Kindly confirm as well which motors are DC or AC on the pricelist C2.2

Kindly refer to attached price list below for details, please ensure you quote for 5 years

4. Please specify which motors are AC or DC on the attached pricelist

Kindly refer to attached price list below (REV1) for details. Items that are DC have been specified, the rest are AC.

5. With reference to the above-mentioned tender for the rewinding, refurbishment and supply of low voltage (AC) and direct current (DC) electrical motors.

I have a few questions regarding the pricing on the NEC3 contract price list.

There is no column for the refurbishment pricing. Are there any addendums for the tender

Are we only supplying a quote for the refurbishment costs that has to be approved prior to commencement of repairs?

The Strip and assess price should also include repairs. Supplier should indicate how much is Strip and assess and the repair price.

6. Would you kindly clarify the Assembly description on the NEC Pricelist; should we price the assembling of the motor only or do we include the repair work that will be done to the motor e.g. overhauling the motor, which includes mechanical repairs to the motor, such as:

- Bearing replacements
- Fan replacements
- Housing repairs
- Shaft repairs
- Testing of motor
- And all other works that need to be done on the motor

Supplier will add the TOTAL for the strip and assess and repairs on the strip and assess column (NEC), however it must show us how much is strip and assess and how much is the repairs.
