

Responses in Red

Everest Perseus T389

1. Lat & long coordinates of the structure positions - 28.570753S 25.900845E
2. The tower types and length to be worked on. - 418A Self Supporting Suspension
3. Drawings of the existing foundations installed. – No drawings for 418
4. Can you perhaps share pictures of the structures to be worked on, this should provide a better understanding of the work to be performed? Picture attached
5. Please confirm if these structures are strain or suspension structures – suspension

Grootvlei Theseus T226

1. Lat & long coordinates of the structure positions - 27.065097S 27.916058E
2. The tower types and length to be worked on. - 501A Self Supporting Suspension
3. Drawings of the existing foundations installed. – See attached for the 501A. We're not sure which one is used for that specific tower. The contractor must verify before they do any work.
4. Can you perhaps share pictures of the structures to be worked on, this should provide a better understanding of the work to be performed? Picture attached
5. Please confirm if these structures are strain or suspension structures – suspension
