RE: CHEMICAL ANALYSIS ON RETAINING RING AT L.H.MARTHINUSEN

A material analysis was carried out using a BRUKER XRF (serial number LE1313)
The chemical analysis was carried out on the below listed parts:

PMI No	Description	Mn	Cr	Mo	Ni	Cu	Nb	Ti	V	Material
1	RETAINING RING	19.700	18.500	0.120	0.500	0.050	0.005	0.001	0.150	P900

The above findings confirm that the specification of the material that was analyzed is similar to the chemical specification as shown in material list

The mechanical properties were not tested.

If you require any further information please do not hesitate to contact us.

Yours Faithfully

Jacques van der Merwe
Report number: JVD-01-11

RETAINING RING
