1 INTRODUCTION

- 1.1. This document outlines the ERI's requirements for the leasing of the yard / depot for Logistics Services Operations and Brokerage department.
- 1.2. Transportation and delivery of various materials from various sites within South Africa (nationally) on an as and when required basis of the capacity of up to 32 tons.
- 1.3. The service provider should be able to provide a depot (yard) to accommodate at least 18 trucks, carport parking for employee vehicles with the offices as per the detailed scope of work.
- 1.4. Logistics Services' (LS) responsibility and commitment is to ensure a safe working environment which is aligned to the Safety, Health, Environmental and Quality Policies, along with applicable legislative obligations.
- 1.5. This SHEQ specification is LS's minimum requirements which shall be met by the service provider including anyone working under their control for the duration of the contract. The service provider shall develop a SHEQ Plan in line with this specification including applicable legislation to the contract scope and those applicable to their business.
- 1.6. LS in no way to assume the service provider's / supplier's legal responsibilities. The service provider / supplier is and remains accountable for the quality and the execution of their SHEQ plan for his employees and anyone doing business with them for this scope.
- 1.7. Where a service provider / supplier appoints a subcontractor/s, the subcontractor/s shall develop a SHEQ plan in line with this specification including applicable legislation they will comply to; the supplier must evaluate the plan and submit approval results to ERI LS SHEQ department.
- 1.8. This SHEQ specification reflects minimum requirements and should not be construed as all encompassing.

NOTE: All the requirements listed hereunder are in relation to the scope and do not supersede or replace any organisational SHEQ requirements.

2 SUPPORTING CLAUSES

2.1 Scope

2.1.1 Purpose

To provide a detailed SHEQ Specification for the provision of leasing of the East London Warehouse.

CONTROLLED DISCLOSURE

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Rotek Industries SOC Ltd.

2.1.1. Applicability

This SHEQ specification is applicable to service providers / suppliers and anyone assisting them to carry out the deliverables outlined as per the scope of work.

2.1.2 Effective Date

This document shall be effective once authorised by all designated signatories.

2.2 Normative/Informative References

Parties using this document shall apply the most recent edition of the documents listed in the following paragraphs.

2.2.1 Normative

- a) SANS 10142-1, Code of Practice for the Wiring of Premises
- b) The National Building Regulations and Building Standards Act 103 of 1977
- c) Occupational Health and Safety Act 85 of 1993 and all applicable Regulations

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Rotek Industries SOC Ltd.

- Adequate office space and kitchen facilities – 5 offices and a Boardroom.
- 12 Seats boardroom facility.
- Adequate entry and access points plus safe evacuation points within the warehouse.
- Basic amenities i.e. water, electricity, etc.
- Provide garden services (grass cutting and shrubs), and yard maintenance.
- Adequate parking space for employees' vehicles – minimum of 10 (ten) vehicles
- Firefighting equipment at strategic locations throughout the Depot, to be inspected by LS.
- First aid boxes to be supplied and inspected by LS.
- Supplier to provide leasing services in East London for a period of 3 (three) years.

4.1 Functional specification

The rental space will enable ERI Logistics Services to continue to offer the following services to Eastern Region:

1. Warehouse facility
2. Consolidated Office space to accommodate 10 seated
3. Private parking
4. Truck loading and offloading materials
5. Truck parking while waiting for loads
6. Driver rest rooms x4 with table and chairs
7. Overnight drivers' sleep room (bunk beds x 5 to accommodate 10 drivers at a time)
8. Showers x3
9. Toilets x3
10. Toilets Office – x2 ladies and x2 gents
11. Kitchen x2 (separate facilities overnight and weekends for drivers and office staff during day)
12. Truck wash bay facility with a 12 000 L capacity or directly connected to the sewerage system.

4. AGREEMENTS

CONTROLLED DISCLOSURE

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Rotek Industries SOC Ltd.

4.2 Section 37(2) Agreement

- 4.2.1 Upon the contractor been awarded the contract and upon approval of the SHEQ documentation, a Section 37(2) agreement will be signed by the client's 16(2) Appointee and the supplier's 16(1) and/or 16(2) Appointee.
- 4.2.2 The original copy of the section 37(2) agreements must be retained by the client and a copy retained by the supplier/Contractor.
- 4.2.3 A copy of the agreement shall be kept in the client's and supplier SHEQ file for review.

4.3 Contractor

It is the responsibility of the supplier/Contractor to ensure that requirements listed in this specification are complied with by developing a SHEQ Plan before any work commences and continually update the file to ensure that it remains relevant to the purpose and scope of work.

4.4 Letter of Good Standing

The Letter of Good Standing ensures that a supplier/Contractor/service provider is in good standing with the Compensation Commissioner or a registered insurer and in the event of an incident occurring, the Commissioner will incur the cost of the injury if the injured is an employee of the supplier/Contractor or subcontractor. A valid copy of the Letter of Good Standing shall be placed in the SHEQ file for verification. No valid letter of good standing, no work.

NOTE: *No proof of payment or deposit slips will be accepted as confirmation of having a valid Letter of Good Standing.*

5 LEGISLATIVE COMPLIANCE/HEALTH AND SAFETY REGULATIONS

5.1 The following legislation is applicable for LS suppliers but not limited to:

SANS 10142-1, Code of Practice for the Wiring of Premises

The National Building Regulations and Building Standards Act 103 of 1977

5.1.1 The Constitution of the Republic of South Africa

5.1.2 SANS 10142-1, Code of Practice for the Wiring of Premises

5.1.3 The National Building Regulations and Building Standards Act 103 of 1977

5.1.4 Occupational Health and Safety Act 85 of 1993 and Regulations

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Rotek Industries SOC Ltd.

6 ACT AND POLICY STATEMENT

6.1 OHS Act Book

- 6.1.1 The contractor and appointed subcontractors shall have the latest copy of the OHS Act and Regulations which should be made available to all employees.

6.2 SHEQ Policy

- 6.2.1 A SHEQ policy is a statement of intent and a commitment by the organisation's top management in relation to the relevant SHEQ roles and responsibilities and the achievement of their strategic objectives.
- 6.2.2 The contractor shall have an approved SHEQ policy signed by the Chief Executive Officer and the policy shall be displayed in prominent areas within the workplace and also be kept in SHEQ files.
- 6.2.3 The contractor shall ensure that their company SHEQ policy is communicated to all employee and proof of communication available on the SHEQ file.

7 APPOINTMENTS

7.1 Dedicated Employer Section (16) (1)

This appointment is made in terms of Section 16(1) of the Occupational Health and Safety Act 85 of 1993. The appointment is for the Chief Executive Officer of the company. This Appointment is inherent; meaning the person occupying the CEO position automatically assumes the responsibilities of the CEO as per the requirements of the act.

7.2 Dedicated Employer Section (16) (2)

This appointment is made in terms of Section 16 of the Occupational Health and Safety Act 85 of 1993. A 16(2) Appointment does not alleviate the 16(1) from his/her responsibilities with regards to Occupational Health and Safety issues but allows a 16(2) to assist the 16(1) in his/her responsibilities.

7.3 Responsible Manager

A competent person shall be appointed for supervising the work with duties as listed in his/her role profile. The appointed person shall have SHEQ and technical training certificates to support the appointment.

7.4 Supplier Organogram

- 7.4.1 The supplier/contractor shall provide an approved organisational organogram related to this scope, listing all the levels of responsibility from the employer Section 16(1) down to the supervisors responsible for the contract. The organogram must list the relevant positions held, names of appointees and legal appointments.

CONTROLLED DISCLOSURE

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Rotek Industries SOC Ltd.

- 7.4.2 The supplier/contractor must ensure that all appointed subcontractors comply with this requirement. The supplier is responsible for keeping copies of all of the organograms. All organograms shall be updated timeously when appointments are changed and filed in the project SHEQ files.
- 7.4.3 All appointees shall be made conversant of their roles and responsibilities, through training and awareness. In addition, copies of the role profiles shall be made available in the SHEQ file for review - the role profile provides a detailed list of responsibilities for the contract team.

8 ROLES AND RESPONSIBILITIES

Visible commitment is essential to providing a safe work environment. Managers, supervisors and employees at all levels must demonstrate their commitment by being proactively involved in the day-to-day operations, in particular the SHEQ aspect of any contract. Legislation requires that each employee must take reasonable care of themselves and their fellow workers, being it management down to the lowest level employee.

8.1 Appointed Contractors

10.1.1 Carry out applicable duties as listed in section 8, 9 and 10 of the OHS Act.

10.1.2 Carry accountability and responsibility for the safety and health of their employees and their appointed subcontractors within their working area, as contemplated by Section 37(2) of the OHS Act.

CONTROLLED DISCLOSURE

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Rotek Industries SOC Ltd.

8.2 Employees

- 8.2.1 All contractors are required to list employee's roles and responsibilities pertaining to the contract and whoever they will be using for conducting inspection and maintenance as per the OEM recommendations. It can be in the organogram form to illustrate roles and responsibilities as well.

9 COMPLIANCE REQUIREMENTS

9.1 Induction Training

- 9.1.1 Every supplier/contractor shall provide Logistics Services SHEQ with proof of their company induction programme including communication thereof.
- 9.1.2 The maintenance personnel shall be inducted by an ERI employee assigned for inducting the visitors on site, ensure every visitor is inducted prior to entering the site or conducting any work.

9.2 Monitoring and Measurement tools

All testing and inspecting tools shall meet the applicable legislative requirement and shall have valid calibration certificates. The supplier must have a clear plan of how this tools/equipment shall be maintained to ensure that they remain accurate through their lifespan or use.

9.3 Issuing of Personal Protective Equipment (PPE) GSR 2

Every supplier/contractor shall conduct a scope specific PPE risk study and issue his/her employees with the identified PPE as per General Safety Regulations 2. If additional and/or specialised PPE is required in order to address hazards as per the scope of work to be performed, the supplier shall provide such PPE. PPE shall be inspected every month and results of such inspections recorded.

Note: results of the PPE risk study shall form part of the SHEQ file.

- 9.3.1 Personal Protective Equipment shall include, but will not be limited to, the following:
- a) Foot protection;
 - b) Respiratory equipment;
 - c) Hand protection;
 - d) Protective clothing e.g. overalls;
 - e) Reflective vests.

CONTROLLED DISCLOSURE

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Rotek Industries SOC Ltd

9.3.2 Personal Protective Equipment shall be maintained in a good and clean condition. Torn (damaged) equipment should be replaced when necessary.

9.4 Reporting of Incidents

The first expectation is to prevent workplace incidents. If systems fail, all incidents occurring in the workplace (in ERI yard) must be reported immediately or within twenty-four (24) hours on an Initial Notification or similar document to the Logistics Services Operations and SHEQ department. In addition, the supplier shall immediately report incidents by telephone/personally to the Logistics Services responsible manager and SHEQ Department. The incident must be investigated by the contractor's incident investigator and the investigation report shall be handed to Logistics Services SHEQ Department within seven (7) working days of the incident occurring. The investigation report shall cover the following aspects:

- a) Scope of Work;
Reporting Structure;
- b) Investigation Team;
- c) Interviewees and Statements;
- d) Dates when Investigation Took Place;
- e) Sequence of Initial Events;
- f) Root and Contributory Causes;
- g) Management and System Shortcomings;
- h) Immediate Corrective Action;
- i) Preventive Action;
- j) Conclusion;
- k) Appendices; and
- l) Photographs of Incident.

NOTE: Please ensure that the Occupational Health and Safety Incident Management Procedure (32-95) is followed for incident management.

9.5 Certificates of Competency for Contractors

Supplier/contractor shall provide to Logistics Services SHEQ a copy of electrical installation certificates of compliance for every building in the yard/depot.

CONTROLLED DISCLOSURE

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Rotek Industries SOC Ltd.

9.6 Risk Assessments

- 9.6.1 Every supplier/contractor shall conduct a baseline risk assessment before the work is to be performed or in the facility to be leased.
- 9.6.2 Environmental aspects and impacts shall be recorded as part of the baseline and task specific risk assessment.
- 9.6.3 Where any other person, other than the team performing the actual work may be impacted by the hazards and risks of the activity being performed, those other persons must also be aware of and sign the risk assessment.

9.7 Housekeeping

- 9.7.1 Contractors shall ensure that good housekeeping practices are maintained before the occupation of the facility. It is evident that most of incidents in the workplaces are caused by poor housekeeping. Facilities deep cleaning to take place with the frequency as stated in the strategy. Garden services to be provided.

9.8 Health and Safety Meetings

- 9.8.1 The supplier/contractor shall conduct and/or be part of the following SHE Meetings:
 - a) Contractors Statutory Meetings (on request)
 - b) Supplier SHE Meetings
 - c) Where Logistics Services SHEQ Department convenes a supplier SHE Meeting, a Senior Representative from each contracting company shall be present at the meeting.

CONTROLLED DISCLOSURE

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder. Eskom Rotek Industries SOC Ltd

9.9 Safe Work Procedure (SWP)

- 9.9.1 The supplier shall demonstrate to Logistics Services SHEQ in a documented format the procedure undertaken to perform work safely on the wash bay provided. The supplier shall ensure that the SWP is communicated with employees of ERI and proof of communication is available on the SHEQ file. The explanation and demonstration of the wash bay use shall be conducted during facility hand-over.

9.10 Behavioural Based Safety Observations (BBSO)

- 9.10.1 BBSO observations may be conducted by any employee from the Logistics Services ERI so as to test the understanding of the contractor's activity especially during the gardening services and maintenance of the facility.

9.11 Emergency Preparedness

- 9.11.1 The contact numbers of the supplier should be provided and displayed on the notice board for emergency contacts.
- 9.11.2 Supplier's employees shall be made aware of the meaning of the client's emergency alarms, how to report an emergency, where to report it and what to do in case of an emergency. This may be covered during the site mini-induction for contractors.

9.12 Environmental Management

- 9.12.1 The supplier/contractor shall ensure that facility is conducive to properly support the policies in environmental management systems. Proper designs and sewer drainage systems to be in compliance with NEMA.

9.13 Facilities

- a) An adequate supply of drinking water shall be provided at or within reasonable access.
- b) The following facilities should, depending on the number of workers and the duration of the work, be provided, kept clean and maintained at or within reasonable access:
- c) Sanitary and washing facilities or showers;
- d) Facilities for changing and for storage;
- e) Drivers' rest room to accommodate a maximum of 10 (ten) employees in one sitting.
- f) Men and women who are workers should be provided with separate ablution and washing facilities.
- g) Overnight driver's sleeping area.

CONTROLLED DISCLOSURE

When downloaded from the document management system, this document is uncontrolled and the responsibility rests with the user to ensure it is in line with the authorised version on the system.

No part of this document may be reproduced without the expressed consent of the copyright holder, Eskom Rotek Industries SOC Ltd.

- h) Must be able to accommodate 18 x 22 meter long trucks with trailers and 20 people during peak period.
- i) Provide building regular maintenance on agreed intervals or as and when it becomes necessary, e.g. painting, building refurbishments, bathrooms and shower and offices deep cleaning
- j) Provide garden services e.g. grass cutting and yard cleaning services on agreed intervals...
- k) Provide domestic waste removal at approved / agreed hygienic intervals or on an as and when required basis including the provision proof of the facility used to dispose of the waste i.e. Waste disposal certificates as and when required. The contractor to provide any other waste related documentation LS might request at any given time.
- l) The waste to be disposed at a registered facility.
- m) The site must have a covered truck wash bay to cater for a 22 meter long truck combination (inter-link).
- n) The yard must be tarred or paved.
- o) The facility should be able to provide for waste removal, water and sanitation as well as a prepaid meter (not a conventional meter) in order to monitor electricity consumption.
- p) Security Risk Management
- q) • Entry point- one access controlled gate with sliding gate and boom
- r) • Security guard house situated at the entrance (main gate).
- s) The facility should be able to provide for waste removal, water and sanitation as well as a prepaid meter (not a conventional meter) in order to monitor electricity consumption.
- t) Security Risk Management
 - Entry point- one access controlled gate with sliding gate and boom
 - Security guard house situated at the entrance (main gate).

15.4 Performance Management Programme

The Supplier shall develop and implement a performance management programme. The Programme shall include:

- Audits and Surveillances
- Regular assessment of the QCPs
- NC and Defect Management
- Inspections and tests
- Risk Management

15.5 Quality Control Plan

Service provision shall be carried out in accordance with a documented and agreed Quality Control Plan/ Inspection and test plan

The supplier shall plan for the required quality related activities and interfaces within the suppliers' quality system in order to demonstrate its ability towards both controlling and meeting Eskom requirements.

The Supplier shall ensure that the QCP is accordance with the Eskom Quality Requirements Specifications, including but not limited to the following requirements:

- Clear and unambiguous description of the equipment and location(s) at which each activity will take place, including facility location(s)
- Identification of quality verification activities and stages
- The details of reference documents, procedures, or method statements to be utilised in performance of the activity, including specific reference to actual sections and pages of procedures, standards, instructions, specifications, etc.
- Definition of acceptance criteria
- Listing of certifying or verifying documents generated to provide evidence of compliance with specified requirements; documents are to be provided using the proper Eskom document numbering requirements
- Identification of supplier and sub-supplier (where applicable) third-party/approved Inspection authority (AIA) and Eskom inspection activities defined in terms witness, hold, document review, and verification monitoring points and provision for sign-off of each of the above-mentioned parties for each intervention point
- Qualification requirements for quality control inspectors, including any third-party/AIA Inspectors
- Listing of all proposed test procedures
- Acceptance criteria for each inspection or test in alignment with specified tolerances
- A section for signed acceptance of the QCP/ITP by the supplier, sub-supplier (where applicable), and Eskom prior to commencement of work
