TECHNICAL EVALUATION CRITERIA FOR POLE TOP SPLIT METERING KIOSKS

Unique Identifier: 240-150758652

Revision: 4

Page: 5 of 8

3. Project Timeframes and Deliverables

The technical evaluation will be conducted over two phases as follows:

3.1 Phase 1: Product A&B Schedules, Risk and Support

Manufacturers shall be evaluated on the tender returnables (Technical Schedules and Risk and Support). Manufacturers which have passed the technical evaluations will be required to provide prototypes and these will be evaluated during phase 2.

3.2 Phase 2: Sample Evaluation

Only suppliers that meet the criteria set aside for phase 1 will move onto phase 2 of the technical evaluation. Manufacturers shall be advised of their qualification for the evaluation after phase 1 whereafter they need to prepare the samples. The samples must be ready for inspection a month after notification. Eskom shall notify the manufacturer of the exact date of the evaluation.

The following items shall be manufactured for technical and quality evaluations:

- Item 1 - Box, pole top split meter 2-way 50A, drawings D-DT-1042 & D-DT-3055 and SAP 0245049
- Item 4 - Box, pole top split meter 4-way 120A, drawings D-DT-1043 & D-DT-3055 and SAP 0245050
- Item 6 - Box, pole top split meter 6-way 120A, drawings D-DT-1044 & D-DT-3055 and SAP 0070315
- Item 7 - Box, pole top split meter 8-way 50A, drawings D-DT-1045 & D-DT-3055 and SAP 0226021

NOTE: The pole top split prepayment metering kiosks must be fully populated as per the SAP descriptions, standard and drawings. Manufacturer visits shall be conducted to evaluate if the pole top split prepayment metering kiosks fulfill design requirements and to verify the information provided in the questionnaire relating to risk and support. The evaluations shall be conducted at the manufacturer's premises.

3.3 Additional evaluation

In an instance that a minimum of 2 manufacturers are not achieved for the original evaluation, then another evaluation process will be considered.

Manufacturers who achieved a threshold or a minimum of 60% score shall be given another opportunity to resubmit all outstanding technical requirements for a re-evaluation of Phase 1. This Technical criteria document shall be used again in the evaluation and there will be no other opportunity given to manufacturers who failed to achieve the minimum requirement of 85% scoring.

4. Tender Returnables (Technical phase 1)

Tenderers shall supply the following information:

- Completed general questionnaire as listed in the Excel files for each item.
- Completed technical schedules for all items tendered as listed in the Excel files for each item.
- Completed risk and support questionnaire as listed in the Excel files for each item.
- Manufacturer drawings of their pole top boxes, data sheets, brochures and test certificates (where applicable).

5. Tender Evaluation (Technical)

Tender responses shall be evaluated using the methodology of the Preferential Procurement Policy Framework Act (PPFA) of 2000.

The technical tender evaluation will comprise a detailed technical evaluation whereby the Product A&B schedules and the Risk and Support questionnaires are evaluated and then the sample evaluations at the manufacturer's manufacturing premises.

The overall technical scoring shall be made up of scoring in the various sub-categories during the different phases of the technical evaluation as follows:

5.1 Phase 1 – Product A&B schedules and Risk and Support

Phase 1 shall be made up of scoring in two sub-categories and shall be adjudicated a score out of 100 as follows:

Table 2: Phase 1 scoring breakdown

Phase 1 - Technical sub-category	Weightings
Product A&B Schedules	60
Risk and Support	40
Total	100
Minimum threshold for qualification	85

Only suppliers that meet the minimum threshold for phase 1 will move onto phase 2 of the technical evaluation.

5.1.1 Phase 1 - Technical Sub-Category: Product A&B Schedules

This section shall comprise scoring of the technical schedules. Major deviations to scored items shall be addressed in Sub-category: Risk and Support.

The A&B Schedules use a default weight of 1 for each scored item. Critical items are assigned higher weights. For example, a weight of 10 indicates that the item will count the same as ten items with weight 1. Each item will be assigned a score by the Eskom evaluation team based upon the tendered response and cross-checked with the supporting documents provided.

Table 3: Scoring of items in Technical Schedules A&B

Criteria	Score
Fully compliant (Indicated as Y in A&B Schedules)	3
Partially compliant - minor deviation (Indicated as P in A&B Schedules)	1
Non-compliant - major deviation (Indicated as N in A&B Schedules)	0

The score for each item will be multiplied by its weight to obtain the total score per item. All scores for the A&B Schedule will be tallied and shall be calculated based on the maximum possible score. This will be recorded as the percentage score.

5.1.2 Phase 1 – Technical Sub-Category: Risk and Support

The Eskom technical team will evaluate the risk and support capability of the manufacturer based on the Risk and Support Questionnaire as listed in the Excel file, deviations schedules and from the non-scored components in Sub-category: Product A&B Schedules. The evaluation of the risk and support of the manufacturer shall be adjudicated a score out of 100 made up of two areas as follows:
