

Dear OHS Professionals, Risk and Assurance and Safety Managers

### **The Status of the Contractor Health and Safety Requirements Standard (32-136)**

The Contractor Health and Safety Requirements Standard (32-136) was up for review in March 2023, but the Contractor OHS Workgroup has taken a decision that each Division shall develop its own OHS Specifications/Requirements for tenders.

To this end, the status regarding the Contractor Health and Safety Requirements Standard (32-136) is as follows:

- The Contractor Health and Safety Requirement Standard (32-136) will be archived with immediate effect and
- All references to this Standard in other Standards and Procedures will be removed during future reviews of such Standards and Procedures.
- The Contractor Health and Safety Requirement Standard (32-136) no longer be referenced in the OHS Specification or Requirements this will guarantee uniformity in the application of Contract and Contractor OHS Management throughout the organisation.
- The Contract and Contractor OHS Management Standard (32-726) will henceforth be utilised for the OHS management of Contracts and Contractors within Eskom Holdings SOC Ltd, including Subsidiaries

**For further clarification on this communication, please contact Peter May, Chairperson of the Contractor OHS Workgroup on 063 127 0888 or [maypq@eskom.co.za](mailto:maypq@eskom.co.za).**

Kind regards

**Miranda Moahlodi**

**Senior Manager Corporate: OHS**
