

ANNEXURE A: PRICE LIST FOR PEAKING SCAFFOLDING CONTRACT

MAIN OPTION A - PRICE LISTS FOR SCAFFOLDING

PREAMBLES TO PRICE LISTS

GENERAL

- 1 The price lists provide the basis of the assessments of the work, and general progress monitoring for the valuation of work. The price lists are not the Works Information.

The Works will be required on an as and when required basis relative to the identified Peaking Power Stations. The Contractor provides forecast of costs relative to the agreed programme.
- 2 The amount due at each application for payment date is based on activities and/or milestones completed.

The Contractor provides all necessary information which is required to determine amounts due at each application for payment relative to the activities and/or milestones completed or to be completed.
- 3 The rates and prices are subject to price adjustment for inflation as applicable in terms of the Employer's conditions and the formulae provided by the Contractor. If no PAfl info is provided the rates are deemed fixed.
- 4 The Contractor's detailed price list schedules summate back to the summary of prices provided and is in sufficient detail to monitor completion of items related to the accepted programme and or milestones in order that payment of completed work may be assessed.
- 5 The method of measurement and payment is made in accordance with the items in these price lists and no claims with regard to work deemed to be associated with such items and/or other methods of measurement will be considered.
- 6 The quantities reflected in these price lists are not to be used for ordering purposes and are provided for evaluation purposes only.
- 7 The quantities relative to the items in the price lists will be measured net where applicable (Contractor to make allowance for all wastage, and for all labour, material, for associated work and/or not separately) and values determined as the work proceeds. No claims will be considered with respect to these variations in quantities or consequential variation in value of work.
- 8 The total of the prices includes for all direct and indirect costs, overheads, profits, on costs, risks, liabilities, obligations, etc. relative to the contract.
- 9 The Contractor allows for all necessary costs to complete the Works as required in terms of the specifications, scope of work and conditions of contract whether expressly stated or not in the price lists. The Contractor provides the Employer with any breakdown of prices as may be required for specific items not detailed in the price lists.
- 10 The Contractor is to check all associated formulae and links between sheets to ensure that the requirements and prices are correct and applicable.
- 11 The Contractor does not make any changes to descriptions or quantities provided by the Employer.
- 12 The Contractor provides details separately relative to requirements for the applicable items if necessary to elaborate on intent and meaning.

PRICE LIST NO 1 - OVERHEAD COSTS, P&G, ETC

- 1.1 All items are assessed relative to the actual requirements for the site and adjusted accordingly if deemed not applicable. The Contractor provides details separately relative to requirements for the applicable items.

- 1.2 The Contractor prices for all costs necessary for the contract task orders for each Power Station.
- 1.3 All quantities provided are indicative and are for evaluation purposes only. These quantities are based on assumptions relative to the possible requirements at each Power Station and are dependent on the number of outages/maintenance and time period that the requirements for scaffolding are needed.

PRICE LIST NO 2 - SCAFFOLDING MATERIAL PROCUREMENT & MAINTENANCE

- 2.1 This price list provides for the cost of scaffolding including procurement, transport to and from site and storage and maintenance of scaffolding and accessories on site, labour, profits, and any other associated costs to provide scaffolding for the Works.
- 2.2 The Contractor provides scaffolding as and when required and instructed for each Station. The requirement for base load of tonnage of scaffolding and or scaffolding obtained on an as and when required basis will be determined for each applicable Power Station site task order.

Contractor identifies and agrees with the Employer what tonnage quantity is necessary to comply with the requirements for each Task Order.
- 2.3 All quantities provided are indicative and are for evaluation purposes only. These quantities are based on assumptions relative to the possible requirements at each Power Station and are dependent on the number of outages/maintenance and time period that the requirements for scaffolding are needed.

PRICE LIST NO 3 - LABOUR FOR SCAFFOLDING REQUIREMENTS

- 3.1 Rates are required for categories of personnel and are allocated relative to the following categories of time to be utilised as required by the Employer at the applicable Power Station:

A- Rates for Labour normal time for weekdays from 06:00 to 18:00

B - Rates for Labour outside normal working hours for weekdays from 18:00 to 06:00 and on Saturdays

C - Rates for Labour for work on Sundays and public holidays
- 3.2 The Employer may at any given time request the addition or removal of personnel as deemed necessary relative to the requirements of the Power Station.
- 3.3 All rates are inclusive of all profits, statutory levies and costs, other labour benefits, leave and sick leave, accommodation, staff related costs such as tools, safety equipment, protective equipment, and clothing (i.e., white overalls for containment purposes), standby, callouts, transport to and from site, site and off-site management and administration costs, training & development etc.
- 3.4 All quantities provided are indicative and are for evaluation purposes only. These quantities are based on assumptions relative to the possible requirements at each Power Station and are dependent on the number of outages/maintenance and time period that the requirements for scaffolding are needed.
