## **Z4 Confidentiality**

For the purposes of compliance, the results generated from Parallel Measurements are evaluated only against South African statutory limits as detailed in clause Z15.1. Control measures conform to the requirements stipulated in the AAIA-approved asbestos work plan.
- Z15.3 The *Purchaser* manages asbestos and ACM according to the Standard.
- Z15.4 In the event that any asbestos is identified while Providing the Services, a risk assessment is conducted and if so required, with reference to possible exposure to an airborne concentration of above the AL for asbestos, immediate control measures are implemented and relevant air monitoring conducted in order to declare the area safe.
- Z15.5 The *Supplier's* personnel are entitled to stop working and leave the contaminated area forthwith until such time that the area of concern is declared safe by either Compliance Monitoring or an AAIA approved control measure intervention, for example, per the emergency asbestos work plan, if applicable.
- Z15.6 The *Supplier* continues to Provide the Services, without additional control measures presented, on presentation of Safe Levels. The contractually agreed dates to Provide the Services, including the Completion Date, are adjusted accordingly. The contractually agreed dates are extended by the notification periods required by regulations 3 and 21 of the Asbestos Regulations.
- Z15.7 Any removal and disposal of asbestos, asbestos containing materials and waste, is done by a registered asbestos contractor, instructed by the *Purchaser* at the *Purchaser's* expense, and conducted in line with South African legislation.

PART 2: PRICING DATA

NEC3 Supply Contract

Document reference	Title	No of pages
C2.1	Pricing assumptions	2
C2.2	The <i>price schedule</i>	2

## C2.1 Pricing assumptions

### 1. How *goods* and *services* are priced and assessed for payment

Clause 11 in NEC3 Supply Contract, (SC3) core clauses states:

<b>Identified and defined terms</b>	11	
	11.2	(11) The Prices are the amounts stated in the price column of the Price Schedule. Where a quantity is stated for an item in the Price Schedule, the Price is calculated by multiplying the quantity by the rate.
		(12) The Price Schedule is the <i>price schedule</i> unless later changed in accordance with this contract.
<b>Assessing the amount due</b>	50.2	The amount due is
		<ul style="list-style-type: none"> <li>the Price for each lump sum item in the Price Schedule which the <i>Supplier</i> has completed,</li> <li>where a quantity is stated for an item in the Price Schedule, an amount calculated by multiplying the quantity which the <i>Supplier</i> has completed by the rate,</li> <li>plus other amounts to be paid to the <i>Supplier</i>,</li> <li>less amounts to be paid by or retained from the <i>Supplier</i>.</li> </ul> <p>Any tax which the law requires the <i>Purchaser</i> to pay to the <i>Supplier</i> is included in the amount due.</p>

This confirms that the Supply Contract is a priced contract where the Prices are derived from a list of items of *goods* and *services* which can be priced as lump sums or as expected quantities of *goods* and *services* multiplied by a rate, or a mix of both.

### 2. Function of the Price Schedule

Clause 53.1 states: "Information in the Price Schedule is not Goods Information". This confirms that instructions to do work or how it is to be done are not included in the Price Schedule but in the Goods Information. This is further confirmed by Clause 20.1 which states, "The *Supplier* Provides the Goods and Services in accordance with the Goods Information". Hence the *Supplier* does **not** Provide the Goods and Services in accordance with the Price Schedule. The Price Schedule is only a pricing document.

### 3. Preparing the *price schedule*

Items in the *price schedule* may have been inserted by the *Purchaser* and the tendering supplier should insert any additional items which he considers necessary. Whichever party provides the items in the *price schedule* the total of the Prices is assumed to be fully inclusive of everything necessary to Provide the Goods and Services as described at the time of entering into this contract.

It will be assumed that the tendering supplier has

- Read Pages 8, 11, 12 and Appendix 5 of the SC3 Guidance Notes before preparing the *price schedule*;
- Included in his Prices and rates for correction of Defects (core clause 43.1) as there is no compensation event for this unless the Defect is due to a *Supplier's* risk;
- Spread the cost of doing work he chooses not to list as separate items in the *price schedule*

across other Prices and rates in order to fulfil the obligation to Provide the Goods and Services for the tendered total of the Prices;

- Understood that there is no adjustment to lump sum prices in the *price schedule* if the amount, or quantity, of work within that lump sum item later turns out to be different to that which the *Supplier* estimated at time of tender. The only basis for a change to the Prices is as a result of a compensation event per clause 60.1;
- Understood that the *Supplier* does not have to allow in his Prices and rates for matters that may arise as a result of a compensation event.

### 3.1. Format of the *price schedule*

Entries in the first four columns in the *price schedule* in section C2.2 are made either by the *Purchaser* or the tendering supplier.

If the *Supplier* is to be paid an amount for the item which is not adjusted if the quantity of work in the item changes, the tendering supplier enters the amount in the Price column only, the Unit, Quantity and Rate columns being left blank.

If the *Supplier* is to be paid an amount for the item which is the rate for the item multiplied by the quantity completed, the tendering *Supplier* enters the rate which is then multiplied by the Quantity to produce the Price, which is also entered.

If the *Supplier* is to be paid an amount for an item proportional to the length of time for which the *goods* and *services* are provided, a unit of time is stated in the Unit column and the length of time (as a quantity of the stated units of time) is stated in the Quantity column.

## 1 Overview and purpose of the goods and services

The goods must be delivered as per the Purchase Order.

Eskom Holdings SOC Limited - Arnot Power Station will only accept deliveries as stipulated in the purchase order during office hours not later than 16:00 from Monday to Thursday and not later than 12:00 on Fridays. No wrong deliveries will be accepted and must be collected by the supplier. Quality and quantity will be assessed on each delivery. The *Supplier* will deliver the agreed quantity i.e., nothing less or more.

Non-deliveries will be a breach of contract conditions and will result in issuing Non-Conformance Report and terminating contract with immediate effect.

## 2 Specification and description of the goods

### 2.2 Specification of the goods (Scope of work)

#### 2.2.1 Abbreviations

Abbreviation	Description
ACV	Auto-Closing Valve
CW	Cooling Water
MCW	Main Cooling Water

#### 2.2.2 Eskom Standards omissions and additions

Eskom document 240-63094243 Standard for Large Bore Resilient Seal Butterfly Valves for use as Cooling Water Isolation Valves will be adhered to.

The contractor must take note of the following exclusions and exceptions to the Standard 240-63094243 mentioned above:

- Section 3.1.2 does not apply
- Section 3.1.3 does not apply
- The entire Section 3.2 does not apply
- Section 7.1 does not apply
- Section 8 does not apply

- The whole of Section 16 does not apply
- Under Section 17, Table 4 notes the use of O-ring type seals, these will not be allowed as mentioned in Section 3.10.2
- Table 5 under Section 17 does not apply
- Table 6 under Section 17 does not apply

Where the specification offers different options, the contractor must clearly indicate which option is included in the offer.

It remains the responsibility of the contractor to perform a site visit to ensure compliance to these requirements, and familiarise himself with the plant layout.

This scope includes for auto-closing valve (ACV) with ACV lever arm and hydraulic cylinder is included in the design. The valves will be exact same face to face as currently installed and same flange drilling as currently fitted as tabled in Table 1.

Annexure A contains a typical water chemistry analysis from Arnot CW system.

It is the contractor's responsibility to review the analysis and ensure that the valve material selection is suitable for this chemistry and operating temperature range from 0°C up to 60°C.

Maximum system operating pressure is 250kPa. Seal tightness test to be done based on a maximum seal shut off of 275kPa. However, design pressure for pressure bearing items (body and disc) will be 375kPa.

### 2.2.3 Factory acceptance testing (FAT)

The hydraulic cylinder will be supplied with hydraulic input to proof the function of the actuator to open and close the valve. Thereafter the hydraulic cylinder maybe removed for transport purposes.

### 2.2.4 Additional information to specification 240-63094243

#### 2.2.4.1 Hydraulic Actuator

The product offered by the *Supplier* must have a direct interface with the existing plant but will be a more modernized design to what is currently fitted, provided it can be fully integrated.

The currently installed ACVs use hydraulic actuation with a 1.7-Ton counterweight. The valve is driven by a hydraulic cylinder and oil pump which is controlled via the ESKOM switchgears. The hydraulic cylinder supplier must send Eskom the specifications to evaluate how it will interface to the plant.
