1. Background

As part of the Group Capital Division (GCD) re-establishment initiative, GCD is seeking to engage a panel of specialist Quality Assurance (QA) and Quality Control (QC) Services (QA/QC) Providers that are ISO 9001:2015 (or later) certified by an Accredited Certification Body to augment and significantly uplift to world class levels our internal capability and capacity in delivering a range of technology projects spanning the refurbishment and upgrading of power stations, as well as green and brown field projects for nuclear, coal, hydro/pumped storage, open and/or combined cycle gas turbine plants, renewables, outage management, transmission, distribution, IT/OT and facilities. Services will be required across all projects and sites being managed through the Group Capital Division.

The Scope of Work outlines the responsibilities and deliverables of the QA/QC Services Provider that will be appointed to provide these services for infrastructure construction projects across Eskom on behalf of GCD. The aim is to ensure that all QA and QC aspects of project development and construction activities are monitored in full compliance with contractual, regulatory, technical, and organisational quality standards to world class levels.

Skills and knowledge transfer are of the utmost importance to GCD as resources have severely been depleted in the past number of years. The provider will be expected to ensure that skills transfer, mentorship and coaching takes place, focused on the GCD employees, and a plan on how this will be achieved must be part of the submission.

It is expected that GCD personnel will be provided with the highest levels of training and mentoring related to: formulation and management of world class levels of quality assurance systems, processes, policies, procedures, tools and maintenance thereof, formulation of quality inspection systems, processes, policies, procedures, tools and maintenance thereof, enhanced exposure to and detailed knowledge of inspection and test equipment, inspection & test responsibilities, asset integrity, welding/NDE, metallurgical investigations, hazardous operations studies and analysis, risk assessments, due diligence and supplier assessment audits (inclusive of audit systems formulation), certification, documentation and data management, meetings and communication.

Fixed ZAR Option (Payment Method 3)

This option is available to those tenderers who are the direct importers of the goods/services for which they have tendered, but do not find Payment Methods 1A, 1B or 2 and allows tenderers to be responsible for the foreign currency and exchange rate risk. If a tenderer selects this payment method, the process is as follows:

- Eskom and the successful tender will engage, on a simultaneous basis, with their respective bankers and compare the exchange rate/s obtained. This is done to ensure that any exchange rate/s used is/are market related.
- Tenderers will be required to match or better the exchange rate/s obtained by Eskom. If the tenderer's exchange rate/s is/are more expensive than the exchange rate/s indicated by Eskom, the exchange rate/s to convert the foreign values into ZAR will be the Eskom exchange rate/s.
- Once the exchange rate/s has/have been agreed by both parties, Eskom will not be liable for any further exchange rate adjustments.

From a Commercial perspective, please take note of the following:

- The foreign currency and foreign currency amount/s that Eskom is/are at risk to, need/s to be indicated in the pricing schedule submitted as part of the tender. If the pricing schedule does not allow for it, the foreign currency and foreign currency amount/s must be indicated in a covering letter.
- The exchange rate to be used in the tender submission is the exchange rate sourced from the South African Reserve Bank on the date the tender is advertised/published.

Take note of the following:

Service-related payment:

When specialist skills are required in South Africa, the local supplier will source the appropriate talent from their network of specialist companies overseas. The specialist is then brought into the country (South Africa) on one of two possible methodologies.

1) Secondment

In this approach, the foreign specialist retains their employment contract with their home unit (Employer overseas) but are seconded to the local company that has a contract with Eskom to work under the direction and control of the local management. Their salaries are paid to the foreign specialist by their home country and that foreign entity then invoices the local supplier (South Africa) in foreign currency for the cost relating to such employees. The invoices would typically be in Euro or GBP, this methodology is usually for short to medium term engagements.

Documents to be attached for payment:

- Commercial invoice from the specialist company
- Local invoice (South African company making use of the specialist services)
- Passport of the specialist and valid work permit
- Activity schedule signed by the contract manager.

2) Payroll Transfer

In this approach, the employee's contract with the overseas employer will be suspended and the specialist takes up a local contract with the local company. The remuneration is then **ZAR** based, the overseas employer is unable to provide the foreign invoice because the employment with the specialist is suspended this methodology is usually favoured for long term engagement. There is no foreign commitment, and the contract will be in ZAR.

PART 2: EXCHANGE RATES

The tenderer shall use the exchange rate as at 12H00 on the date of the advertisement of the tender. The source of the exchange rates shall be the South African Reserve Bank (www.resbank.co.za) Please note that the tenderer is required to submit proof of the SARB rate/s used.
