C1.2 TSC3 Contract Data

Part one - Data provided by the *Employer*

Completion of this data in full, according to the Options chosen, is essential to create a complete contract.

Clause	Statement	Data
1	General	
	The <i>conditions of contract</i> are the core clauses and the clauses for main Option:	
		A: Priced contract with price list
	dispute resolution Option	W1: Dispute resolution procedure
	and secondary Options	
		X1: Price adjustment for inflation
		X2: Changes in the law
		X17: Low service damages
		X18: Limitation of liability
		X19: Task Order
		Z: Additional conditions of contract
	of the NEC3 Term Service Contract April 2013 ¹ (TSC3)	
10.1	The <i>Employer</i> is (name):	Eskom Holdings SOC Ltd (reg no: 2002/015527/30), a state owned company incorporated in terms of the company laws of the Republic of South Africa
	Address	Registered office at Megawatt Park, Maxwell Drive, Sandton, Johannesburg
	Tel No.	[•]
	Fax No.	[•]
10.1	The <i>Service Manager</i> is (name):	Thami Simelane
	Address	Kusile Power Station
	Tel	013 680 3132
	Fax	N/A
	e-mail	SimelaPT@eskom.co.za

¹ Available from Engineering Contract Strategies Tel 011 803 3008 Fax 086 539 1902 www.ecs.co.za

11.2(2)	The Affected Property is	Kusile Power Station
11.2(13)	The <i>service</i> is	Kusile Power Station Dams Concrete and High-Density Polyethylene Liner Repairs
11.2(14)	The following matters will be included in the Risk Register	None
11.2(15)	The Service Information is in	Part 3: Scope of Work and all documents and drawings to which it makes reference.
12.2	The <i>law of the contract</i> is the law of	the Republic of South Africa
13.1	The <i>language of this contract</i> is	English
13.3	The <i>period for reply</i> is	Two working days
2	The Contractor's main responsibilities	Data required by this section of the core clauses is also provided by the <i>Contractor</i> in Part 2 and terms in italics used in this section are identified elsewhere in this Contract Data
21.1	The <i>Contractor</i> submits a first plan for acceptance within	Two weeks of the Contract Date
3	Time	
30.1	The <i>starting date</i> is.	01 February 2026
30.1	The <i>service period</i> is	60 months
4	Testing and defects	There is no reference to Contract Data in this section of the core clauses and terms in italics used in this section are identified elsewhere in this Contract Data
5	Payment	
50.1	The <i>assessment interval</i> is	between the 25th day of each successive month.
51.1	The <i>currency of this contract</i> is the	South African Rand
51.2	The period within which payments are made is	60 Days
51.4	The <i>interest rate</i> is	<p>the publicly quoted prime rate of interest (calculated on a 365 day year) charged by from time to time by the Standard Bank of South Africa Limited (as certified, in the event of any dispute, by any manager of such bank, whose appointment it shall not be necessary to prove) for amounts due in Rands and</p> <p>(ii) the LIBOR rate applicable at the time for amounts due in other currencies. LIBOR is the 6 month London Interbank Offered Rate quoted under the caption "Money Rates" in The Wall Street Journal for the applicable currency or if no rate is quoted for the currency in question then the rate for United States Dollars, and if no such rate appears in The Wall Street Journal then the rate as quoted by the Reuters Monitor Money Rates Service (or such service as may</p>

		replace the Reuters Monitor Money Rates Service) on the due date for the payment in question, adjusted <i>mutatis mutandis</i> every 6 months thereafter (and as certified, in the event of any dispute, by any manager employed in the foreign exchange department of The Standard Bank of South Africa Limited, whose appointment it shall not be necessary to prove.
6	Compensation events	There is no reference to Contract Data in this section of the core clauses and terms in italics used in this section are identified elsewhere in this Contract Data
7	Use of Equipment Plant and Materials	There is no reference to Contract Data in this section of the core clauses and terms in italics used in this section are identified elsewhere in this Contract Data
8	Risks and insurance	
80.1	These are additional <i>Employer's</i> risks	1. [●] 2. [●] 3. [●]
83.1	The <i>Employer</i> provides these insurances from the Insurance Table	as stated for "Format TSC3" available on http://www.eskom.co.za/Tenders/InsurancePolicies/Procedures/Pages/EIMS_Policies_From_1_April_2014_To_31_March_2015.aspx (See Annexure A for basic guidance).
83.1	The <i>Employer</i> provides these additional insurances	as stated for "Format TSC3" available on http://www.eskom.co.za/Tenders/InsurancePolicies/Procedures/Pages/EIMS_Policies_From_1_April_2014_To_31_March_2015.aspx (See Annexure A for basic guidance)
83.1	The <i>Contractor</i> provides these additional insurances:	[●]
83.1	The minimum amount of cover for insurance against loss and damage caused by the <i>Contractor</i> to the <i>Employer's</i> property is	the amount of the deductibles relevant to the event described in the "Format TSC3" insurance policy available on http://www.eskom.co.za/Tenders/InsurancePolicies/Procedures/Pages/EIMS_Policies_From_1_April_2014_To_31_March_2015.aspx
83.1	The insurance against loss of or damage to the <i>works</i> , Plant and Materials is to include cover for Plant and Materials provided by the <i>Employer</i> for an amount of	[●]
83.1	The minimum amount of cover for insurance in respect of loss of or damage to property (except the <i>Employer's</i> property, Plant and Materials and Equipment) and liability for bodily injury to or death of a person (not an employee of the <i>Contractor</i>) arising from or in connection with the <i>Contractor's</i> Providing	whatever the <i>Contractor</i> deems necessary in

	the Service for any one event is:	addition to that provided by the <i>Employer</i> .
83.1	The minimum limit of indemnity for insurance in respect of death of or bodily injury to employees of the <i>Contractor</i> arising out of and in the course of their employment in connection with this contract for any one event is:	As prescribed by the Compensation for Occupational Injuries and Diseases Act No. 130 of 1993 and the <i>Contractor's</i> common law liability for people falling outside the scope of the Act with a limit of Indemnity of not less than R500 000 (Five hundred thousand Rands)..
9	Termination	There is no reference to Contract Data in this section of the core clauses and terms in italics used in this section are identified elsewhere in this Contract Data.
10	Data for main Option clause	
A	Priced contract with price list	
20.5	The <i>Contractor</i> prepares forecasts of the final total of the Prices for the whole of the service at intervals no longer than	2 weeks.
11	Data for Option W1	
W1.1	The <i>Adjudicator</i>	the person selected from the ICE-SA Division (or its successor body) of the South African Institution of Civil Engineering Panel of Adjudicators by the Party intending to refer a dispute to him. (see www.ice-sa.org.za). If the Parties do not agree on an Adjudicator the Adjudicator will be appointed by the Arbitration Foundation of Southern Africa (AFSA).
	Address	[•]
	Tel No.	[•]
	Fax No.	[•]
	e-mail	[•]
W1.2(3)	The <i>Adjudicator nominating body</i> is:	the Chairman of ICE-SA a joint Division of the South African Institution of Civil Engineering and the Institution of Civil Engineers (London) (see www.ice-sa.org.za) or its successor body.
W1.4(2)	The <i>tribunal</i> is:	arbitration
W1.4(5)	The <i>arbitration procedure</i> is	the latest edition of Rules for the Conduct of Arbitrations published by The Association of Arbitrators (Southern Africa) or its successor body.
	The place where arbitration is to be held is	[•] South Africa
	The person or organisation who will choose an arbitrator	
	- if the Parties cannot agree a choice or	the Chairman for the time being or his nominee
	- if the arbitration procedure does not state who selects an arbitrator, is	of the Association of Arbitrators (Southern Africa) or its successor body.

X18.2	For any one event, the <i>Contractor's</i> liability to the <i>Employer</i> for loss of or damage to the <i>Employer's</i> property is limited to	<p>the amount of the deductibles relevant to the event described in the "Format TSC3" insurance policy available on http://www.eskom.co.za/Tenders/InsurancePoliciesProcedures/Pages/EIMS_Policies_From_1_April_2014_To_31_March_2015.aspx</p>																		
X18.3	The <i>Contractor's</i> liability for Defects due to his design of an item of Equipment is limited to	<p>The greater of</p> <ul style="list-style-type: none"> the total of the Prices at the Contract Date and the amounts excluded and unrecoverable from the <i>Employer's</i> insurance (other than the resulting physical damage to the <i>Employer's</i> property which is not excluded) plus the applicable deductibles in the <i>Employer's</i> assets and works / maintenance policies available on http://www.eskom.co.za/Tenders/InsurancePoliciesProcedures/Pages/EIMS_Policies_From_1_April_2014_To_31_March_2015.aspx 																		
X18.4	The <i>Contractor's</i> total liability to the <i>Employer</i> , for all matters arising under or	the total of the Prices other than for the additional excluded matters.																		

	in connection with this contract, other than the excluded matters, is limited to	<p>The <i>Contractor's</i> total liability for the additional excluded matters is not limited.</p> <p>The additional excluded matters are amounts for which the <i>Contractor</i> is liable under this contract for</p> <ul style="list-style-type: none"> • Defects due to his design, plan and specification, • Defects due to manufacture and fabrication outside the Affected Property, • loss of or damage to property (other than the <i>Employer's</i> property, Plant and Materials), • death of or injury to a person and • infringement of an intellectual property right.
X18.5	The <i>end of liability date</i> is	12 months after the end of the <i>service period</i>.
X19	Task Order	
X19.5	The <i>Contractor</i> submits a Task Order programme to the <i>Service Manager</i> within	7 days of receiving the Task Order
Z	The <i>additional conditions of contract</i> are	Z1 to Z11 always apply.

Z1 Cession delegation and assignment

- Z1.1 The *Contractor* does not cede, delegate or assign any of its rights or obligations to any person without the written consent of the *Employer*.
- Z1.2 Notwithstanding the above, the *Employer* may on written notice to the *Contractor* cede and delegate its rights and obligations under this contract to any of its subsidiaries or any of its present divisions or operations which may be converted into separate legal entities as a result of the restructuring of the Electricity Supply Industry.

Z2 Joint ventures

- Z2.1 If the *Contractor* constitutes a joint venture, consortium or other unincorporated grouping of two or more persons or organisations then these persons or organisations are deemed to be jointly and severally liable to the *Employer* for the performance of this contract.
- Z2.2 Unless already notified to the *Employer*, the persons or organisations notify the *Service Manager* within two weeks of the Contract Date of the key person who has the authority to bind the *Contractor* on their behalf.
- Z2.3 The *Contractor* does not alter the composition of the joint venture, consortium or other unincorporated grouping of two or more persons without the consent of the *Employer* having been given to the *Contractor* in writing.

Z3 Change of Broad Based Black Economic Empowerment (B-BBEE) status

- Z3.1 Where a change in the *Contractor's* legal status, ownership or any other change to his business composition or business dealings results in a change to the *Contractor's* B-BBEE status, the

Contractor notifies the *Employer* within seven days of the change.

- Z3.2 The *Contractor* is required to submit an updated verification certificate and necessary supporting documentation confirming the change in his B-BBEE status to the *Service Manager* within thirty days of the notification or as otherwise instructed by the *Service Manager*.
- Z3.3 Where, as a result, the *Contractor's* B-BBEE status has decreased since the Contract Date the *Employer* may either re-negotiate this contract or alternatively, terminate the *Contractor's* obligation to Provide the Service.
- Z3.4 Failure by the *Contractor* to notify the *Employer* of a change in its B-BBEE status may constitute a reason for termination. If the *Employer* terminates in terms of this clause, the procedures on termination are P1, P2 and P4 as stated in clause 92, and the amount due is A1 and A3 as stated in clause 93.

Z4 Ethics

- Z4.1 Any offer, payment, consideration, or benefit of any kind made by the *Contractor*, which constitutes or could be construed either directly or indirectly as an illegal or corrupt practice, as an inducement or reward for the award or in execution of this contract constitutes grounds for terminating the *Contractor's* obligation to Provide the Service or taking any other action as appropriate against the *Contractor* (including civil or criminal action).
- Z4.2 The *Employer* may terminate the *Contractor's* obligation to Provide the Service if the *Contractor* (or any member of the *Contractor* where the *Contractor* constitutes a joint venture, consortium or other unincorporated grouping of two or more persons or organisations) is found guilty by a competent court, administrative or regulatory body of participating in illegal or corrupt practices.

Such practices include making of offers, payments, considerations, or benefits of any kind or otherwise, whether in connection with any procurement process or contract with the *Employer* or other people or organisations and including in circumstances where the *Contractor* or any such member is removed from the an approved vendor data base of the *Employer* as a consequence of such practice.

- Z4.3 Notwithstanding the provisions of core clause 90.2, the procedures on termination in terms of this clause are P1, P2 and P4 as stated in the core clause 92 and the amount due is A1 and A3 as stated in core clause 93.

Z5 Confidentiality

- Z5.1 The *Contractor* does not disclose or make any information arising from or in connection with this contract available to Others. This undertaking does not, however, apply to information which at the time of disclosure or thereafter, without default on the part of the *Contractor*, enters the public domain or to information which was already in the possession of the *Contractor* at the time of disclosure (evidenced by written records in existence at that time). Should the *Contractor* disclose information to Others in terms of clause 25.1, the *Contractor* ensures that the provisions of this clause are complied with by the recipient.
- Z5.2 If the *Contractor* is uncertain about whether any such information is confidential, it is to be regarded as such until notified otherwise by the *Service Manager*.
- Z5.3 In the event that the *Contractor* is, at any time, required by law to disclose any such information which is required to be kept confidential, the *Contractor*, to the extent permitted by law prior to disclosure, notifies the *Employer* so that an appropriate protection order and/or any other action can be taken if possible, prior to any disclosure. In the event that such protective order is not, or cannot, be obtained, then the *Contractor* may disclose that portion of the information which it is required to be disclosed by law and uses reasonable efforts to obtain assurances that confidential treatment will be afforded to the information so disclosed.

Z5.4 The taking of images (whether photographs, video footage or otherwise) of the Affected Property or any portion thereof, in the course of Providing the Service and after the end of the *service period*, requires the prior written consent of the *Service Manager*. All rights in and to all such images vests exclusively in the *Employer*.

Z5.5 The *Contractor* ensures that all his subcontractors abide by the undertakings in this clause.

Z6 Waiver and estoppel: Add to core clause 12.3:

Z6.1 Any extension, concession, waiver or relaxation of any action stated in this contract by the Parties, the *Service Manager* or the *Adjudicator* does not constitute a waiver of rights, and does not give rise to an estoppel unless the Parties agree otherwise and confirm such agreement in writing.

Z7 Health, safety and the environment: Add to core clause 27.4

- Z7.1 The *Contractor* undertakes to take all reasonable precautions to maintain the health and safety of persons in and about the execution of the *service*. Without limitation the *Contractor*:
- accepts that the *Employer* may appoint him as the "Principal Contractor" (as defined and provided for under the Construction Regulations 2014 (promulgated under the Occupational Health & Safety Act 85 of 1993) ("the Construction Regulations") for the Affected Property;
 - warrants that the total of the Prices as at the Contract Date includes a sufficient amount for proper compliance with the Construction Regulations, all applicable health & safety laws and regulations and the health and safety rules, guidelines and procedures provided for in this contract and generally for the proper maintenance of health & safety in and about the execution of the *service*; and
 - undertakes, in and about the execution of the *service*, to comply with the Construction Regulations and with all applicable health & safety laws and regulations and rules, guidelines and procedures otherwise provided for under this contract and ensures that his Subcontractors, employees and others under the *Contractor's* direction and control, likewise observe and comply with the foregoing.
- Z7.2 The *Contractor*, in and about the execution of the *service*, complies with all applicable environmental laws and regulations and rules, guidelines and procedures otherwise provided for under this contract and ensures that his Subcontractors, employees and others under the *Contractor's* direction and control, likewise observe and comply with the foregoing.

Z8 Provision of a Tax Invoice and interest. Add to core clause 51

- Z8.1 Within one week of receiving a payment certificate from the *Service Manager* in terms of core clause 51.1, the *Contractor* provides the *Employer* with a tax invoice in accordance with the *Employer's* procedures stated in the Service Information, showing the amount due for payment equal to that stated in the payment certificate.
- Z8.2 If the *Contractor* does not provide a tax invoice in the form and by the time required by this contract, the time by when the *Employer* is to make a payment is extended by a period equal in time to the delayed submission of the correct tax invoice. Interest due by the *Employer* in terms of core clause 51.2 is then calculated from the delayed date by when payment is to be made.
- Z8.3 The *Contractor* (if registered in South Africa in terms of the companies Act) is required to comply with the requirements of the Value Added Tax Act, no 89 of 1991 (as amended) and to include the *Employer's* VAT number 4740101508 on each invoice he submits for payment.

Z9 Notifying compensation events

- Z9.1 Delete the last paragraph of core clause 61.3 and replace with:

If the *Contractor* does not notify a compensation event within eight weeks of becoming aware of the event, he is not entitled to a change in the Prices.

Z10 *Employer's limitation of liability*

- Z10.1 The *Employer's* liability to the *Contractor* for the *Contractor's* indirect or consequential loss is limited to R0.00 (zero Rand)
- Z10.2 The *Contractor's* entitlement under the indemnity in 82.1 is provided for in 60.1(12) and the *Employer's* liability under the indemnity is limited to compensation as provided for in core clause 63 and X19.11 if Option X19 Task Order applies to this contract.

Z11 *Termination: Add to core clause 91.1, at the second main bullet point, fourth sub-bullet point, after the words "against it":*

- Z11.1 or had a business rescue order granted against it.

Annexure A: Insurance provided by the Employer

These notes are provided as guidance to tendering contractors and the Contractor about the insurance provided by the Employer. The Contractor must obtain its own advice. Details of the insurance itself are available from the internet web link given below.

1. Services provided in a TSC3 contract could include some element of construction or refurbishment as well as a continuous maintenance or operational service activity. If an event occurs which causes loss or damage, a claim could be made either against the *Employer's* "works" type policy which may be in place for the *Employer's* portion of the Affected Property concerned or against the *Employer's* assets policy which may be in place for the *Employer's* portion of the Affected Property concerned, or both.
2. The cover provided and the deductibles under the works policy are different to those under the assets policy. Each policy has a range of applicable deductibles depending on the location of the Affected Property and the nature of the insurable event.
3. The *Contractor* is required in terms of Contract Data for clause 83 to provide cover for the deductibles in the insurance provided by the *Employer*. This can be provided from his own resources on a 'self insured' basis or obtained by him from his own insurers. In order to assess the extent of this cover, tendering contractors and their brokers should consult the internet web link given below and scroll to '**Format TSC3**' to establish both the cover and the deductibles in relation to the *service* provided in terms of this contract.
4. Tendering contractors should note that cover provided by the *Employer* is only per the policies available on the internet web link listed below and may not be the cover required by the tendering contractor or as intended by each of the listed insurances in the left hand column of the Insurance Table in clause 83.2. In terms of clause 83.1 "the *Contractor* provides the insurances stated in the Insurance Table except any insurance which the *Employer* is to provide". Hence the *Contractor* provides insurance which the *Employer* does not provide and in cases where the *Employer* does provide insurance the *Contractor* insures for the difference between what the Insurance Table requires and what the *Employer* provides.
5. If Marine Insurance is required the *Contractor* needs to obtain a copy of the latest edition of Eskom's Marine Policies Procedures found at internet website given below.
6. Further information and full details of all Eskom provided policies and procedures may be obtained from:

[http://www.eskom.co.za/Tenders/InsurancePoliciesProcedures/Pages/EIMS_Policies_
From_1_April_2014_To_31_March_2015.aspx](http://www.eskom.co.za/Tenders/InsurancePoliciesProcedures/Pages/EIMS_Policies_From_1_April_2014_To_31_March_2015.aspx)

C1.2 Contract Data

Part two - Data provided by the *Contractor*

Notes to a tendering contractor:

1. Please read both the both the NEC3 Term Service Contract April 2013 and the relevant parts of its Guidance Notes (TSC3-GN)¹ in order to understand the implications of this Data which the tenderer is required to complete.
2. The number of the clause which requires the data is shown in the left hand column for each statement however other clauses may also use the same data.
3. Where a form field like this [] appears, data is required to be inserted relevant to the option selected. Click on the form field **once** and type in the data. Otherwise complete by hand and in ink.

Completion of the data in full, according to Options chosen, is essential to create a complete contract.

Clause	Statement	Data
10.1	The <i>Contractor</i> is (Name): Address Tel No. Fax No.

A	Priced contract with price list		
11.2(12)	The <i>price list</i> is in _____		
11.2(19)	The tendered total of the Prices is	R	_____

PART 2: PRICING DATA

TSC3 Option A

Document reference	Title	No of pages
C2.1	Pricing assumptions: Option A	2
C2.2	The <i>price list</i>	[•]

C2.1 Pricing assumptions: Option A

1. How work is priced and assessed for payment

Clause 11 in NEC3 Term Service Contract (TSC3) core clauses and Option A states:

Identified and defined terms	11	
	11.2	(12) The Price List is the <i>price list</i> unless later changed in accordance with this contract.
		(17) The Price for Services Provided to Date is the total of <ul style="list-style-type: none"> the Price for each lump sum item in the Price List which the <i>Contractor</i> has completed and where a quantity is stated for an item in the Price List, an amount calculated by multiplying the quantity which the <i>Contractor</i> has completed by the rate.
		(19) The Prices are the amounts stated in the Price column of the Price List. Where a quantity is stated for an item in the Price List, the Price is calculated by multiplying the quantity by the rate.

This confirms that Option A is a priced contract where the Prices are derived from a list of items of service which can be priced as lump sums or as expected quantities of service multiplied by a rate or a mix of both.

2. Function of the Price List

Clause 54.1 in Option A states: "Information in the Price List is not Service Information". This confirms that instructions to do work or how it is to be done are not included in the Price List but in the Service Information. This is further confirmed by Clause 20.1 which states, "The *Contractor* Provides the Service in accordance with the Service Information". Hence the *Contractor* does **not** Provide the Service in accordance with the Price List. The Price List is only a pricing document.

3. Link to the *Contractor's* plan

Clause 21.4 states "The *Contractor* provides information which shows how each item description on the Price List relates to the operations on each plan which he submits for acceptance". Hence when compiling the *price list*, the tendering contractor needs to develop his first clause 21.2 plan in such a way that operations shown on it can be priced in the *price list* and result in a satisfactory cash flow in terms of clause 11.2(17).

4. Preparing the *price list*

Before preparing the *price list*, both the *Employer* and tendering contractors should read the TSC3 Guidance Notes pages 14 and 15. In an Option A contract, either Party may have entered items into the *price list* either as a process of offer and acceptance (tendering) or by negotiation depending on the nature of the *service* to be provided. Alternatively the *Employer*, in his Instructions to Tenderers or in a Tender Schedule, may have listed some items that he requires the *Contractor* to include in the *price list* to be prepared and priced by him.

KUSILE POWER STATION DAMS CONCRETE AND HIGH-DENSITY POLYETHYLENE LINER REPAIRS

It is assumed that in preparing or finalising the *price list* the *Contractor*:

- Has taken account of the guidance given in the TSC3 Guidance Notes relevant to Option A;
- Understands the function of the Price List and how work is priced and paid for;
- Is aware of the need to link operations shown in his plan to items shown in the Price List;
- Has listed and priced items in the *price list* which are inclusive of everything necessary and incidental to Providing the Service in accordance with the Service Information, as it was at the time of tender, as well as correct any Defects not caused by an *Employer's* risk;
- Has priced work he decides not to show as a separate item within the Prices or rates of other listed items in order to fulfil the obligation to complete the *service* for the tendered total of the Prices.
- Understands there is no adjustment to items priced as lump sums if the amount, or quantity, of work within that item later turns out to be different to that which the *Contractor* estimated at time of tender. The only basis for a change to the (lump sum) Prices is as a result of a compensation event.

4.1. Format of the *price list*

(From the example given in an Appendix within the TSC3 Guidance Notes)

Entries in the first four columns in the *price list* in section C2.2 are made either by the *Employer* or the tendering contractor.

If the *Contractor* is to be paid an amount for the item which is not adjusted if the quantity of work in the item changes, the tendering contractor enters the amount in the Price column only, the Unit, Expected Quantity and Rate columns being left blank.

If the *Contractor* is to be paid an amount for an item of work which is the rate for the work multiplied by the quantity completed, the tendering contractor enters the rate which is then multiplied by the Expected Quantity to produce the Price, which is also entered.

If the *Contractor* is to be paid a Price for an item proportional to the length of time for which a service is provided, a unit of time is stated in the Unit column and the expected length of time (as a quantity of the stated units of time) is stated in the Expected Quantity column.

C2.2 the price list

Item No	Description	Unit	Qty	Rate	Amount
1	Preliminary & General	-			
1.1	Fixed	-			
1.1.1	Site Establishment for: Delivery of Office Converted Containers (3m x 12m)	Once Off	1		
1.1.2	Site Establishment for: Delivery of Kitchen Converted Container (3m x 6m)	Once Off	1		
1.1.3	Site Establishment for: Delivery of Ablution Container (3m x 9m)	Once Off	1		
1.1.4	Kitchen: 3m x 6m, Fitted with Single Bowl Sink with a work top, Fitted with undercounter cupboard (1 Off)	Once Off	1		
1.1.5	Office Converted Containers (3m x 12m) (2 Off)	Once Off	1		
1.1.6	Ablution: 3m x 12m - 11 Toilet Split M/F (1 Off)	Once Off	1		
1.1.7	Safety file	Once Off	1		
1.1.8	Medicals - Entry (Per Person)	Per Person	10		
1.1.9	Medicals - Exit (Per Person)	Per Person	10		
1.1.10	Security Clearance Certification (Per Person)	Per Person	10		
1.1.13	Site Bakkie (4x2 Double Cab Bakkie) (1 Off)	Per Month	5		
1.1.14	Light Driven Vehicle (LDV) (1 Off)	Per Month	5		
1.1.18	Site vehicle (Sedan) (1 Off)	Per Month	5		
	Total Item 1 (Preliminaries and General) carried to Final Summary:				
2	Resources				
2.1	Normal Hours				
2.1.1	Construction Manager – 5 Years Relevant experience (1 Off)	Hours	800		
2.1.2	Site Supervisor – 5 Years Relevant experience (1 Off)	Hours	800		
2.1.3	Safety Officer – 3 Years Relevant experience (1 Off)	Hours	800		
2.1.4	Quality Assurance and Controller - 3 Years Relevant experience (1 Off)	Hours	800		
2.1.5	HDPE Welder - 3 Years Relevant experience (1 Off)	Hours	800		
2.1.6	General Worker – 3 Years Relevant experience (4 Off)	Hours	3200		
2.1.7	Driver (For Sedan) (1 Off)	Hours	800		
	Sub-Total for item 2.1 Normal Hours Carried to Final Summary:				
2.2	Overtime -Saturday				
2.2.1	Construction Manager – 5 Years Relevant experience (1 Off)	Hours	120		
2.2.2	Site Supervisor – 5 Years Relevant experience (1 Off)	Hours	120		
2.2.3	Safety Officer – 3 Years Relevant experience (1 Off)	Hours	120		
2.2.4	Quality Assurance and Controller - 3 Years Relevant experience (1 Off)	Hours	120		
2.2.5	HDPE Welder - 3 Years Relevant experience (1 Off)	Hours	120		
2.2.6	General Worker – 3 Years Relevant experience (4 Off)	Hours	480		
2.2.7	Driver (For Sedan) (1 Off)	Hours	120		
	Sub-Total for item 2.2 Overtime - Saturday carried to Final Summary:				
2.3	Overtime - Sundays and Public Holidays				
2.3.1	Construction Manager – 5 Years Relevant experience (1 Off)	Hours	120		
2.3.2	Site Supervisor – 5 Years Relevant experience (1 Off)	Hours	120		
2.3.3	Safety Officer – 3 Years Relevant experience (1 Off)	Hours	120		

2.3.4	Quality Assurance and Controller - 3 Years Relevant experience (1 Off)	Hours	120		
2.3.5	Semi-Skilled – 3 Years Relevant experience (9 Off)	Hours	120		
2.3.6	General Worker – 3 Years Relevant experience (4 Off)	Hours	480		
2.3.7	Driver (For Sedan) (1 Off)	Hours	120		
	Sub-Total for Overtime - Sundays and Public Holidays Carried to Final Summary:				
	Total for Item 2 (Resources) caried to Final Summary:				
3	MATERIAL	-			
3.1.1	Cuspated drainage liner – 1.5 mm thick	m²	93 394		
3.1.2	HDPE liner – 1.5 mm thick	m²	93 394		
3.1.3	Bidim A4 geotextile	m²	93 394		
3.1.4	Breaking and removing defective anchor concrete	m³	750		
3.1.5	Replace concrete anchor trench (cast-in-place)	m³	750		
3.1.6	Reinforcement steel	kg	35 385		
	Total for Item 3 (Material) Carried to Final Summary:				
4	EQUIPMENTS				
4.1.1	Extrusion welding – small patch (<1 m²)	Each	1		
4.1.2	Hot Wedge Welder	Each	1		
4.1.3	Vacuum Box	Each	1		
4.1.4	Pressure Test kit	Each	1		
4.1.5	Air Pump	Each	1		
4.1.6	Spark Tester	Each	1		
4.1.7	Wedge trial weld peel tester	Each	1		
	Total for Item 4 (Equipments) Carried to Final Summary:				
				TOTAL AMOUNT EXCL VAT

1 Description of the service

1.1 Executive overview

1.1.1 Ash Dump Dirty Dam

The Ash Dump Dirty Dams (ADDD) are two HDPE lined, holding dams that are used as a collection point for the polluted storm water from the ash dump before it is pumped to the SDD. The ADDD is designed to store the run-off from a once in fifty-year storm event from the active ash dump surface area and the three-year rehabilitation zone. Compartment 1 of the ADDD can store a volume of 120,050 m³ and compartment 2 stores 125,145 m³. The maximum height of both compartments is 5.8m.

Each compartment has a deepened concrete lined well compartment for reserve storage of irrigation and dust control water for the ash dump. The wells are concrete lined to allow front-end loader access for cleaning. Ramps are provided for access to the concrete lined well.

The ADDD can be accessed from the ramp on the western side of the ADDD pump station. At the crest, a 5m wide access road does a loop around the perimeter of the structure. This provides access to both maintenance access ramps.

1.1.2 Holding/Recycle Dam

The Holding Recycle Dams (HRD) are two HDPE lined, holding dams that are the final storage point for the Station's clarified storm water and wash-down water. Each compartment of the HRD stores a volume of 34,046 m³ with a height of 5.7m. Spillway overflow is provided by two pipes from each compartment. Overflow from the HRD is sent back to the SDD via the CSY ST.

The dam floors are sloped to the southern end to facilitate drainage and cleaning. The southern end of each compartment has a deepened well compartment for storage of settled products. The wells are concrete lined to allow front-end loader access for cleaning. Ramps are provided for access to the concrete lined wells.

1.1.3 Station Dirty Dam

The Station Dirty Dams (SDD) are two lined, temporary holding dams that act as a collection point for all polluted storm water and wash-down water, before it is pumped to the HRD. Each compartment of the SDD stores a volume of 90,980 m³ with a height of 7m.

The SDD will receive inflows from two sources, the CSY ST and the SDD ST.

The dam floors are sloped to the southern end to facilitate drainage and cleaning. The southern end of each compartment has a deepened well compartment for storage of settled products. The wells are concrete lined to allow front-end loader access for cleaning. A ramp is provided for access to the concrete lined well.

The SDD can be accessed from the ramp on the south-eastern corner of the dam. At the crest, a 5m wide access road does a loop around the perimeter of the structure. This provides access to both maintenance access ramps.

1.1.4 Coal Stockyard Settling Tanks

There are two settling tank compartments at the Coal Stockyard Settling Tank (CSY ST). Each compartment is 144.8 m long with a maximum depth of 5.6m. Each compartment has a capacity of 11,707 m³ at overflow weir, full supply level (FSL). The 200mm thick concrete tank floors, over the liner system, slope slightly to the southern end to facilitate emptying and cleaning. Each compartment is fitted with a series of under and over-flow weirs to still the water flow.

The CSY ST receives inflows from the Coal Stockyard (CSY), emergency ash dump, limestone stockyard, and the degrit sumps. Clarified water leaving the CSY ST will travel via gravity pipeline to the SDD. A concrete lined ramp is provided to allow front-end loader and personnel access to each of the two compartments for cleaning.

1.1.5 Station Dirty Dams Settling Tanks

There are two settling tank compartments at the Station Dirty Dam Settling Tank (SDD ST). Each compartment is 144.8 m long with a maximum depth of 5.6m. Each compartment has a capacity of 11,707 m³ at overflow weir, full supply level. The 200mm thick concrete tank floors, over the liner system, slope

slightly to the northern end to facilitate emptying and cleaning. Each compartment is fitted with a series of under and over-flow weirs to still the water flow.

The SDD ST receives inflows from the station terrace area. Clarified water leaving the SDD ST travels via gravity pipeline to the SDD. A concrete lined ramp is provided to allow front-end loader and personnel access to each of the two compartments for cleaning.

1.1.6 Raw Water Reservoir

The Raw Water Reservoir comprises two compartments lined with a double layer HDPE liner with a drainage layer and a leakage detection system. The reservoir has a gross storage capacity at FSL of 679,315 m³ for both compartments at a maximum depth of 12.3m. The reservoir receives raw water from the Kendal raw water pipeline.

1.1.7 Inspections

Each PCD and settling tank compartment is emptied at least once a year for inspection, cleaning and repairs to the HDPE and concrete liner as well as other components within the dam basins. It is unlikely that the raw water reservoir will be emptied regularly, however some defects may occur on higher levels of the reservoir or might become evident as water levels drop.

1.1.8 Waste Removal

The Contractor is responsible for rubble removal from the work site. Kusile Power Station has a waste storage facility that the Contractor may use to dispose of their rubble.

The contractor must provide at least one front end loader with a minimum 3m³ bucket as well as a 35T articulated dump truck (ADT).

1.1.9 Competency

Technicians performing seaming operations shall be suitably trained in the operation of the specific seaming equipment being used and shall demonstrate their competence by successfully welding trial seams in accordance with SANS 10409 [5].

1.1.10 Risk Assessments

Working on a wet HDPE liner introduces unique safety risks due to the liner's slippery surface and the possibility of water intrusion. Here are some safety considerations that a contractor must address:

- Slip and Fall Prevention
- Personal protective equipment (e.g. Personal Flotation Devices)
- Rescue and Emergency Equipment:
- Safety training

1.1.11 Quality Control Procedures

The Contractor must compile the construction, installation method statement, quality control (QC) and quality assurance (QA) documents and submit to the Employer for review. The Employer will provide representation for items indicated in the QCP and ITP.

1.2 Employer's requirements for the service

The servicing, repairs, inspections of the dam lining as well as the supply and delivery of lining material.

1.2.1 Contractor

- Executes the defined scope according to contractual agreements
- Submits all relevant and necessary documentation requested by the Employer once works are completed
- The Contractor shall supply lining/tiling material, epoxies, bolts, plastic welding equipment and all required tools to execute works.
- The Contractor shall ensure that all maintenance is executed as per Employer's instructions, maintenance strategies, processes and systems.
- The Contractor shall be responsible for all mechanical maintenance activities within this scope of work.
- Contractor shall provide engineering support services that will be discussed and approved by the Employer
- The Contractor shall manage and ensure the availability of all required spares necessary for ensuring smooth plant/equipment operation. Employer and contractor will discuss and agree on on-site/off-site spares strategy necessary to meet the operation strategy.
- The Contractor shall provide the following complementary services to improve Plant and labour performance
 - Method statements and Material Safety Data Sheet
 - Compile and improve task list's and QCP's
 - Implement approved design and modification
 - Spares management
 - Technical advice
 - Component failure analysis reporting
- The Contractor shall ensure that any service rendered does not interfere with the Employer's scheduled work and should align himself with the Employer's work control management process.
- Should the Employer become aware of any changes to the activity schedule (programme of notifications), the Employer may issue the Contractor with a revised programme.
- The Employer and contractor to agree on what repairs should be done onsite and off-site.
- This contract is for preventative, predictive, corrective maintenance (breakdowns) and opportunity maintenance.
- The contractor shall be responsible to clean up any chemical spillages and housekeeping should be done during and/or after execution of the tasks.
- The contractor shall apply QCP process on all the tasks to be executed.
- The Contractor shall ensure that they have responsible persons (in terms of PSR) for any work performed on plant. All maintenance technically qualified (above semi-skilled) Contractors will be trained and authorised (in terms of PSR) within 6 months after the contract start date.
- The Contractor shall implement of continuous improvement to optimise Plant performance and reduce system and equipment failures.

1.2.2 Employer

- Review and approves the Contractor's reports, method statement, Quality Control Procedures (QCP) and Inspection Test Plans (ITP) Is present for all applicable points of the ITP and QCP
- Performance is measured by the Employer against those areas which contribute to the Employer's business and the Contractor shall be evaluated monthly against specific Key Performance Indicators. (e.g. Reliability, Availability and Safety).
- The Employer is to provide power connection points that are within a reasonable proximity to the work areas.
- Employer shall provide training for PSR, and any other training as deemed necessary by the Employer. All other functionality training shall be the responsibility of the Contractor.
- The Employer and Contractor in this SOW are committed towards the following.
 - Retention of critical skills
 - Continuous cost reduction
 - Health & Safety Environment
 - Transfer of operational experience and skills

1.2.3 Breakdowns

KUSILE POWER STATION DAMS CONCRETE AND HIGH-DENSITY POLYETHYLENE LINER REPAIRS

This refers to emergency breakdowns requiring immediate action to be taken. It is a corrective maintenance (retro-active strategy) whereby action is only taken when a system or component failure has occurred. The *Contractor* will be responsible for arranging all the resources (this include but is not limited to manpower, tools, special tools and consumables) required to attend to breakdowns. The *Contractor* shall provide a 24-hour per day, 7-day per week stand-by service for emergencies/breakdowns/defects after the *Contractor's* regular working hours and the *Contractor* must be on site within 60 minutes of a call-out as and when required.

If the *Contractor* does not have a team available at the time of a breakdown, he will be responsible to arrange for a sub-contractor to do the work under the same conditions and pricing structure as agreed upon under this contract, unless otherwise agreed with the *Employer*.

In addition to the repair of the breakdown, the *Contractor* will also conduct a thorough inspection in order to determine the root cause of the failure and issue a comprehensive failure report to the *Employer*. Where necessary, the *Contractor* will recommend corrective actions to the *Employer*.

The *Contractor* must provide warranties and or guarantees for all the services, refurbishments and repairs done on the dams.

The *Contractor* will be responsible for the cleaning of the surfaces and surrounding areas on each of the areas where work was performed. On completion, all oil and grease spillages will be properly cleaned, and other materials will be removed and disposed of by the *Contractor* in accordance with the *Employer's* policies and procedures. In case where the services of a subcontractor have been obtained by the *Contractor*, the *Contractor* shall also be responsible for the cleaning of the work area.

1.3 Interpretation and terminology

The following abbreviations are used in this Service Information:

Abbreviation	Explanation
ADDD	Ash Dump Dirty Dam
CSY	Coal Stockyard
CSY ST	Coal Stockyard Settling Tank
FGD	Flue Gas Desulfurization
HDPE	High-Density Polyethylene
HRD	Holding Recycling Dam
ITP	Inspection, Testing Plan
J	Joule
PCD	Pollution Control Dam
QCP	Quality Control Procedure
RWR	Raw Water Reservoir
SDD	Station Dirty Dam
SDD ST	Station Dirty Dam Settling Tank

2 Management strategy and start up.

2.1 The *Contractor's* plan for the service

The *Contractor* supplies the *Employer* with their *Contractor's* plan. The *Contractor* must submit the *Contractor's* plan at the inception of this contract. The *Contractor's* plan must include but is not limited to the following:

- Quality management system implementation programme.
- A Quality Control Plan (QCP) for each Task Order with: hold, witness and verification points for the *Employer* to check and monitor progress.
- Safety plan including implementation programme.
- Staff Qualifications and experience and/or time frame for appointment of staff. Staff qualifications must be verified by a recognised and accredited Qualifications Verifications Institution on an annual basis.
- A program and resource schedule for the *Service* and for each Task Order. Bar charts or other reporting formats, as may be required by the *Employer*, are provided for all Task Orders indicating start, inspection and completion dates, resources and costs.
- Names of the possible /potential candidates/employees.
- Any staff replacement should be accepted by the *Employer* and the replacement must meet the conditions stipulated above.

Preventative maintenance will be carried out during the *Contractor's* working hours and as required in terms of the 24-hour standby provision. In case of any major breakdowns and/or when required by the *Employer*, a repair plan of action must be submitted to the *Employer*. Repair work must commence no later than the time agreed between the *Employer* and the *Contractor* on his plan of action.

The following reports are required as supporting documentation to the program:

- Time analysis print-out
- Critical activities report
- Key event report
- Quality Control Plan

Planning and scheduling meetings will be held when necessary and the *Employer* will inform the *Contractor* of the format and time of these meetings.

If the *Contractor's* available manpower is not sufficient to meet the *Contractor's* plan, the *Contractor* submits labour alert reports for performance of the work.

During the latter stages of completing the *Service* and prior to delivering notice of completion, the *Contractor* submits his plan for demobilisation to the *Service Manager* for acceptance.

The *Contractor* submits a procurement schedule for the procurement and receipt of equipment and sub-contracts by the *Contractor* and a monthly status report of all such equipment.

The *Contractor* commences with the work in accordance with the *Contractor's* plan and completes the *service* not later than the Completion Dates indicated on the *Contractor's* plan.

If the *Contractor* fails to complete any part of the *service* according to the *Contractor's* plan or it becomes apparent to the *Service Manager* that the *service* cannot be completed according to the *Contractor's* plan and if such failure is due to the *Contractor* then the *Contractor* submits his plan of action to the *Service Manager* to deal with the delay and the *Contractor* reports on the success of his plan of action.

2.2 Management meetings

Regular meetings of a general nature may be convened and chaired by the *Service Manager* as follows:

Title and purpose	Approximate time & interval	Location	Attendance by:
Risk register and compensation events	Monthly on _____ at _____	MS Teams and/or Kusile Power Station	<i>Employer, Contractor</i> and _____

KUSILE POWER STATION DAMS CONCRETE AND HIGH-DENSITY POLYETHYLENE LINER REPAIRS

Overall contract progress and feedback	Monthly on _____ at _____	MS Teams and/or Kusile Power Station	<i>Employer, Contractor and _____</i>
Contract Meeting	Monthly on _____ at _____	MS Teams and/or Kusile Power Station	<i>Employer, Contractor and _____</i>
Morning / Toolbox Meetings	Daily	MS Teams and/or Kusile Power Station	<i>Employer, Contractor and _____</i>

Meetings of a specialist nature may be convened as specified elsewhere in this *Service Information* or if not so specified by persons and at times and locations to suit the Parties, the nature and the progress of the service. Records of these meetings shall be submitted to the *Service Manager* by the person convening the meeting within five days of the meeting.

All meetings shall be recorded using minutes or a register prepared and circulated by the person who convened the meeting. Such minutes or register shall not be used for the purpose of confirming actions or instructions under the contract as these shall be done separately by the person identified in the *conditions of contract* to carry out such actions or instructions.

The *Contractor's* representative and *Employer's* representative will hold monthly contract management meetings where all safety, quality and other contract issues will be discussed, which should include the following as a minimum

- a) Review the overall performance of the contract.
- b) Formulate strategies to address loopholes should they be found.
- c) Review contract statutory compliance.
- d) The *Contractor* does not procure the services of sub-contractors / vendors / suppliers without the prior approval of the *Employer's Representative*. Furthermore, the contract between the *Contractor* and the sub-contractor must be aligned with this contract.

Meetings of a specialist nature may be convened by either party and at times and locations to suit the Parties, the nature and the progress of the *Service*.

All meetings shall be recorded using minutes and an attendance register (which must be signed by all present) prepared and circulated by the person who convened the meeting. All these documents must be kept safe for the duration of the contract and thereafter stored in the *Employer's* documentation centre. Regular meetings of a general nature may be convened and chaired by the *Service Manager*.

2.3 Contractor's management, supervision and key people

2.3.1 Provision of Manpower

The *Contractor* shall utilise/provide skilled and suitable qualified staff with experience in the following:

- Inspections and repairs of Lining and Tiling of dams
- Occupational Health and Safety Act 85 of 1993 and SHE Standards
- Quality Management Control and Assurance as per ISO Standards
- Report and procedure writing

2.3.2 People

- a) The *Contractor* shall employ staff members who meet the minimum requirements of Eskom job descriptions with additional requirements to be specified.
- b) All staff brought onto site in connection with the scope of work of this contract should be able to fluently speak, understand and write in English.
- c) The *Contractor* shall submit proof of qualifications and CV (experience and records) on request by the employer
- d) The *Contractor* shall ensure that all staff members brought onto Kusile Power Station site have valid medical fitness certificate based on the plant Man Job Specification. The *Contractor* staff members must also have a valid security clearance certificate and site induction conducted on an annual basis.

2.4 Documentation control

The standard forms to be used by the *Contractor* in the administration of the contract, such as early warning and compensation event notifications are to be submitted to the *Employer* and shall be on the NEC document format which shall be made available to the *Contractor* by the *Employer*.

All formal contractual communication shall be in the form of properly compiled letters or forms attached to emails and not as a message in the email itself. Emails shall only be used to follow up on formal contractual communication or for information purposes only. All formal contractual communication shall have a reference number in a chronological sequence.

2.5 Invoicing and payment

Within one week of receiving a payment certificate from the *Service Manager* in terms of core clause 51.1, the *Contractor* provides the *Employer* with a tax invoice showing the amount due for payment equal to that stated in the *Service Manager's* payment certificate.

The *Contractor* shall address the tax invoice to
Finance Department (Accounts Payable Section)

and include on each invoice the following information:

- Name and address of the *Contractor* and the *Service Manager*
- The contract number and title
- *Contractor's* VAT registration number
- The *Employer's* VAT registration number 4740101508
- Description of service provided for each item invoiced based on the Price List
- Total amount invoiced excluding VAT, the VAT and the invoiced amount including VAT
- (add other as required)

Add procedures for invoice submission and payment (e. g. electronic payment instructions)

2.6 Training workshops and technology transfer

The *Contractor* shall conduct skills transfer to the *Employer's* resident service provider so that the Buffalo Feeders are inspected properly, and first line investigation is done accurately. The skills transfer shall be conducted during the bi-weekly maintenance by allowing the resident service provider for the Employer to shadow the serviceman and assistant serviceman when they conduct Preventive Maintenance. Skills transfer shall also be conducted during breakdown situations by both the *Contractor* and the resident service provider working together to repair the Buffalo Feeders and bring them back to service.

2.7 Design and supply of Equipment

The *Contractor* shall supply inspection and maintenance manuals to the *Employer*. These manuals shall include first line investigation and troubleshooting protocols.

The *Contractor* shall prepare a Quality Control Plan for the Stackers and Drum Reclaimers to be refurbished and send it to the *Employer* to include intervention points (Hold, Witness and surveillance) to be adhered to during the refurbishment program.

The *Contractor* shall not proceed with any repairs or refurbishment points unless all the necessary inspections, witness or tests are conducted according to the Quality Control Plan. The *Employer* shall conduct such inspections to ascertain that work is conducted to the agreed upon quality standard. However, the liability for such designs, refurbishment, supply and use of the Equipment remains with the *Contractor*.

2.8 Things provided at the end of the service period for the Employer's use

2.8.1 Equipment

None

2.8.2 Information and other things

N/A

2.9 Management of work done by Task Order

- Work is to be done in accordance with the written Task Order issued by the *Employer*.
- All work done is valued in accordance with the Price List unless otherwise specified. Actual quantities will be determined where applicable based on the requirements of each Task Order. The *Contractor* provides all necessary information required by the *Employer* to determine the cost at the assessment date for monthly costs and for each Task Order.

3 Health and safety, the environment and quality assurance

3.1 Health and safety risk management

The *Contractor* shall comply with the health and safety requirements contained in Annexure **KUS-20250407** to this Service Information.

3.2 Environmental constraints and management

The *Contractor* shall comply with the environmental criteria and constraints stated in Annexure **KUS-20250407**

3.3 Quality assurance requirements

The *Contractor* shall comply with the quality assurance requirements and constraints stated in Annexure **KUS-20250407**

4 Procurement

4.1 People

4.1.1 Minimum requirements of people employed

- a) The *Contractor* shall employ staff members who meet the minimum requirements of Eskom job descriptions with additional requirements to be specified.
- b) All staff brought onto site in connection with the scope of work of this contract should be able to fluently speak, understand and write in English.
- c) The *Contractor* shall submit proof of qualifications and CV (experience and records) on request by the employer
- d) The *Contractor* shall ensure that all staff members brought onto Kusile Power Station site have valid medical fitness certificate based on the plant Man Job Specification. The *Contractor* staff members must also have a valid security clearance certificate and a site induction conducted on an annual basis.
- e) The Serviceman and the Serviceman Aid must have a minimum of two years' experience working with Reclaim Buffalo Feeders.

4.1.2 BBBEE and preferencing scheme

The *Contractor* shall maintain a minimum BBBEE level 4 score for the duration of the contract.

4.2 Subcontracting

4.2.1 Preferred subcontractors

- All Subcontractors are to be *Employer* approved *Contractors* / vendors / suppliers. If the *Contractor* is uncertain of the approval status of the *Contractors* / vendors / suppliers, the *Contractor* formally requests from the *Service Manager* confirmation of the status.
- The *Contractor* does not procure the services of *Contractors* / vendors / suppliers without the prior approval of the *Service Manager*. Furthermore, the contract between the *Contractor* and the subcontractor must be aligned with these contracts.
- No work shall commence without all employees having done safety and medical checks prescribed by the *Employer*.
- The *Contractor* must submit a safety file at the inception of this contract.
- The *Contractor* complies with all site regulations issued by the *Employer*.

4.2.2 Limitations on subcontracting

The *Contractor* may not subcontract more than 25% of the total value of this contract. Subcontractors that are submitted by the *Contractor* for the approval of the *Employer* must have a similar or better BBBEE score than the *Contractor*.

4.3 Plant and Materials

4.3.1 Specifications

The *Contractor* shall comply with the Scope of Work requirements contained in Annexure _____ to this Service Information. The Scope of Work is titled Kusile Power Station Buffalo Feeder Maintenance Scope of Work, with document identifier **KUS- 20250606**

4.3.2 Correction of defects

The *Contractor* shall comply with the Scope of Work requirements contained in Annexure _____ to this Service Information. The Scope of Work is titled Kusile Power Station Buffalo Feeder Maintenance Scope of Work, with document identifier **KUS- 20250606**

5 Working on the Affected Property

5.1 Employer's site entry and security control, permits, and site regulations

The *Contractor* provides security necessary for the protection of the works at all times until the Completion of the whole of the works.

The *Contractor* is informed of the access procedures through Site Regulations and note that such procedures may change depending on the prevailing security situation.

All persons entering the Kusile Power Station site pass through the control points at the main access gates and are required to have temporary permits that are issued to *Contractor* staff on request. All persons submit ID documents with the application for temporary permits. If it is necessary to bring equipment onto site a list is submitted which is verified by security staff prior to equipment entering the security area.

If any *Contractor* staff are transferred from Kusile Power Station or leave site, the person's permit is handed over to the Supervisor. The *Contractor* ensures that personnel leaving site are transported out of the security area and that the permit is returned.

No firearms, weapons, alcohol, illegal substances and cameras (including cell phones with cameras) are permitted on Site. No 'Private Work' is carried out for or on behalf of any Eskom employee. Kusile Power Station has zero tolerance to alcohol and drugs. There is 100% alcohol breathalyser testing for all persons coming to site. Any person that tests positive will not be granted access to site and shall be considered to be in violation of the Eskom's Life Saving Rules. If an employee or *Contractor* employee is suspected of being under the influence of alcohol is tested and if proved positive, he/she is refused entry to site. Formal disciplinary action shall be constituted by the *Contractor*.

The generator area and the other units are barricaded and out of bounds and only authorised persons are permitted. Areas outside the site are out of bounds to the *Contractors* staff.

All the assets must be declared and registered with security upon entering site. This includes portable assets such as a laptop. The record must be kept on the OV18 form. No asset shall be removed from site if the OV18 form is not attached.

The Contractor shall have no claim against the Employer in respect of delay at the security main gate

N.B: Under no circumstances shall the *Contractor* recruit outside Kusile Power Station's security gate. An applicable local office for recruitment shall be used. Enquiries must be directed to HR Department

5.2 People restrictions, hours of work, conduct and records

The normal working hours are as follows:

Mondays – Thursdays: 07h00 – 16h15

Fridays: 07h00 – 12h00

Lunch breaks are 30 minutes from 12h00

5.3 Records of Contractor's Equipment

All materials, tools and equipment brought onto site are the responsibility of the *Contractor* and shall comply with the *Employer's* policies and procedures. A proper system of recording these materials, tools and equipment must be in place and submitted for approval by the *Service Manager*. Differentiation must be made between materials, tools and equipment owned or hired by the Contractor.

Any Equipment, or appliances, used by the Contractor conforms to the applicable OHS Act safety standards and is maintained in a safe and proper working condition. The *Service Manager* has the right to stop the *Contractor's* use of any Equipment which, in the opinion of *Service Manager*, does not conform to the foregoing.

5.4 Equipment provided by the *Employer*

Off-loading and material handling Equipment such as cranes and forklifts are not available on site and if required is to be provided by the *Employer*.

6 List of drawings

6.1 Drawings issued by the *Employer*

This is the list of drawings issued by the *Employer* at or before the Contract Date and which apply to this contract.

Drawing number	Revision	Title
		Kusile Chute Drawings (Sherperd to provide)
