	<p><b>Factory and Product Evaluation</b></p> <p>The Eskom registered confidential Desktop evaluation report which indicates the technical submission items that were evaluated and those that met the technical threshold for qualification, will be presented to Commercial. The selection of the suppliers and factories to be visited shall be upon Eskom discretion.</p> <p>The purpose of the factory visit is to perform the factory Evaluation, to assess the capability of the factory to deliver the requirements. The factory product Evaluation at the factory is to ensure if the product meets the technical requirements as specified. During this visit, Eskom will also discuss the technical deviations that the technical evaluators found during the Desktop evaluation. The technical evaluators shall populate the applicable Product Evaluation Check Sheets for all findings, and these shall be raised with the supplier and factory representatives and recorded under the Evaluation Agreement Form (Annex D). An Eskom confidential report will be produced for these Evaluations.</p> <p>The technical evaluator is responsible for explaining to the tenderer and factory representatives that the purpose of the visit is not a negotiation, but purely an Evaluation of the product which has been offered to ensure the compliance with Eskom requirements as specified.</p> <p><b>Factory Evaluation</b></p> <p>Eskom technical evaluators will visit the factory to assess the capabilities of the factory, machinery, skills, and technical processes, to ensure the factory can deliver on the requirements. The following will be included: -</p> <ul style="list-style-type: none"> <li>• Manufacturing Methods</li> <li>• Workshop Practices</li> <li>• Design Practices and Application</li> <li>• Testing Facility and Practices</li> <li>• Raw material Procurement, Storage and Sub-contractor practices</li> <li>• Site and Other Services</li> <li>• Factory Performance (including the On Time Delivery (OTD) and Factory Failure Rate (FFR))</li> </ul> <p>The factory evaluation criteria are as shown in Annexure F. The OEM must obtain at least 80% to pass the factory evaluation. Where the criterion is met, one point will be awarded and zero points will be awarded for criterion not met, e.g. Yes = 1 and No =0. The factory evaluation results are not a gatekeeper for product evaluation. All findings and recommendations will form part of the evaluation agreement form.</p> <p><b>Product Evaluation</b></p> <p>At the factory, the technical evaluators shall verify the <b>type test records</b> kept. Furthermore, the Eskom technical evaluators shall assess the product(s) using the Compliance Clause by Clause Schedule (Annexures B), Check Sheets (Annexure E) and Evaluation Agreement document</p>

**Fixed ZAR Option (Payment Method 3)**

This option is available to those tenderers who are the direct importers of the goods/services for which they have tendered, but do not find Payment Methods 1A, 1B or 2 and allows tenderers to be responsible for the foreign currency and exchange rate risk. If a tenderer selects this payment method, the process is as follows:

- Eskom and the successful tender will engage, on a simultaneous basis, with their respective bankers and compare the exchange rate/s obtained. This is done to ensure that any exchange rate/s used is/are market related.
- Tenderers will be required to match or better the exchange rate/s obtained by Eskom. If the tenderer's exchange rate/s is/are more expensive than the exchange rate/s indicated by Eskom, the exchange rate/s to convert the foreign values into ZAR will be the Eskom exchange rate/s.
- Once the exchange rate/s has/have been agreed by both parties, Eskom will not be liable for any further exchange rate adjustments.

**From a Commercial perspective, please take note of the following:**

- The foreign currency and foreign currency amount/s that Eskom is/are at risk to, need/s to be indicated in the pricing schedule submitted as part of the tender. If the pricing schedule does not allow for it, the foreign currency and foreign currency amount/s must be indicated in a covering letter.
- The exchange rate to be used in the tender submission is the exchange rate sourced from the South African Reserve Bank on the date the tender is advertised/published.
- Due to the payments being made in ZAR, but based on an agreed exchange rate, the tenderer will be required to submit proof of importation at time of payment.

When specialist skills are required in South Africa, the local supplier will source the appropriate talent from their network of specialist companies overseas. The specialist is then brought into the country (South Africa) on one of two possible methodologies.

#### 1) **Secondment**

In this approach, the foreign specialist retains their employment contract with their home unit (Employer overseas) but are seconded to the local company that has a contract with Eskom to work under the direction and control of the local management. Their salaries are paid to the foreign specialist by their home country and that foreign entity then invoices the local supplier (South Africa) in foreign currency for the cost relating to such employees. The invoices would typically be in Euro or GBP, this methodology is usually for short to medium term engagements.

#### **Documents to be attached for payment:**

- Commercial invoice from the specialist company
- Local invoice (South African company making use of the specialist services)
- Passport of the specialist and valid work permit
- Activity schedule signed by the contract manager.

#### 2) **Payroll Transfer**

In this approach, the employee's contract with the overseas employer will be suspended and the specialist takes up a local contract with the local company. The remuneration is then **ZAR** based, the overseas employer is unable to provide the foreign invoice because the employment with the specialist is suspended this methodology is usually favoured for long term engagement. There is no foreign commitment, and the contract will be in ZAR.
