<b>Items</b>	<b>Clarification / Discussion</b>
<b>01</b>	<p>Would it be possible to have the unprotected Bill of quantities for the 4 sections. It just makes it easier for us to input data for the tender.</p> <p>cells on the bills that require input from suppliers are editable; cells that are locked no input is required from the supplier.</p> <p>Only clarification should be raised if there are cells that are protected and input is required from supplier.</p>
