

Laptop Performance requirements.

Mainstream Laptops (General Office Use)

Lenovo L14; i5 CPU; 8GB RAM; 512GB SSD; Windows 10 Pro

High Spec Laptops(Engineering Spec)

Lenovo P15; i7 CPU; 8/16GB RAM; 512GB/1TB SSD; Windows 10 Pro

Please note that the computer must have a Working and Activated Operating System, all the required productivity Software like Microsoft Office and Adobe Reader, and an up to date Antivirus Software.

Network and printing services will be provided. All software should come preinstalled, our technicians will only handle the setup and install only Eskom related systems/software like SPO etc.

The latest computers usually come with Windows 11. They don't have to downgrade the operating system, we will attempt to configure it but if it has to be downgraded then they will have to do so. They might also loose any administrative rights to their computer when they connect to the Eskom network and once that is done, the computer should only be used to connect to the Eskom physical network and no other physical network.
